

WHATEVER YOU WANT TO SAW, WE HAVE THE SAWS TO DO IT.

BOSCH
Ideas that work.

Bosch has the right jigsaw for every application. Irrespective of whether you require a tool for precise and exact angle cuts, or for robust application. The powerful cordless tools know no limits with regard to unrestricted freedom of movement and flexibility.

**THE NEW JIGSAW GST 135 BCE
PROFESSIONAL**

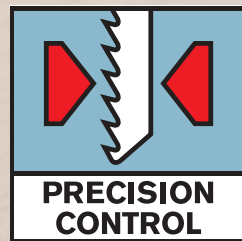

TRULY PROFESSIONAL

BOSCH GIVES IT TO YOU STRAIGHT!

BOSCH INVENTED THE JIGSAW. WE DIDN'T STOP THERE, BECAUSE WHAT'S WORTH INVENTING IS WORTH PERFECTING...

- 1947 first jigsaw in the world
- 1966 first orbital jigsaw
- 1970 first jigsaw with electronics
- 1984 first commercial cordless orbital jigsaw
- 1989 first SDS jigsaw – tool-free changing of saw blades
- 2002 first 24 V jigsaw
- 2004 first jigsaw with easy Precision Control.

Our patented system, Precision Control, is the name given to the new system used for the first time in the GST 135. The exact adjustment of the saw blade is made by the push of a button, whereby two tungsten-carbide jaws adapt to the saw blade thickness precisely. In this way, the saw blade is provided with additional lateral support, which makes accurate work with exact angles possible.

The saw blade is inserted as before.

Everything perfectly adjusted at the push of a button.

With Precision Control.

THIS IS WHAT YOU GET.

Our new system, Precision Control, works at the push of a button, saves a lot of time and rules out incorrect adjustment. It ensures accurate work results, including exact angles by reducing blade wander, especially in thick wood and sandwich materials as well as precision work in thin metal sheets. Expensive rework is at last a thing of the past.

Furthermore, the splinter protection guarantees splinter-free saw cuts.

WE INVENTED THE JIGSAW – OVER AND OVER AGAIN.

The smooth running guarantees impressive results in all kinds of material.

LOW VIBRATION:

The counter balance in the gearing guarantees extremely low vibration levels and results in quiet running when sawing. This is particularly important for precise sawing or working with thin, sensitive materials. The result: Top work results and fatigue free work.

COMFORT:

Our latest jigsaw generation is characterised, above all, by one thing in particular: All functions can be operated without additional tools. The jigsaw can not only be used and locked effortlessly with one hand, but can also eject the blade: Simply slide over the SDS lever and the saw blade springs out. No more burnt fingers on hot saw blades. Only available from Bosch.

A single lever movement is all it takes for the hot saw blade to spring out by itself.

Tool-free: Adjustment of base plate from 0° to 45° or move horizontally to the back for closer cuts.

LIFETIME:

Our new jigsaw generation combines tried and tested technology with innovative new features. Making this jigsaw even better than our topseller, the legendary GST 85/GST 2000. The aluminium housing of the GST 135 guarantees the best possible support for the gearing – and for a long machine life. Our new jigsaw features a professional stacked construction for optimum motor mounting and simple maintenance.

Long life, durable construction, easily copes with the toughest applications on site.

IN ADDITION:

- Powerful 720 watt motor
- Constant Electronics – Provides constant speed in demanding applications to maintain speed under a variety of loads
- Accelerator trigger allows fingertip speed control
- Variable speed dial and trigger for maximum control
- Lock-on button for continuous running
- SDS system – tool free blade change
- Heavy duty base plate for high stability
- SDS base plate adjustment for bevel cuts – lever action with tension adjustment wheel
- Air blower function keeps cutting line clear of dust
- 4 stage pendulum action for high cutting performance
- Soft grip handle adds comfort and control

COMES COMPLETE WITH:

- Dust extraction tube
- Chip cover
- Anti splinter guard
- Anti scratch overshoe
- 3 saw blades
- Carry case

YOU'LL THINK YOU'RE PLUGGED IN: THE CORDLESS JIGSAWS FROM BOSCH.

The GST 24 V is the first 24 Volt jigsaw in the world and one of the most powerful saws on the market. With one battery charge, for example, over 20 running metres can be sawn in 22 mm chip boards. The GST 24 V is particularly robust due to its magnesium gear housing and aluminium base plate. It also has convenient features such as SDS, blowing-air function and a four-stage pendulum. The GST 24 V belongs to the powerful Max Power System – lots of tools, where one battery fits all.

As the world's largest manufacturer of saw blades, Bosch always develops in a system, i.e. tools and accessories combined. This ensures perfect operation and optimised work results. Bosch works closely with craftsmen, for example, to find solutions for cuts in all important materials. This process involves matching every saw blade perfectly to the respective application. An example of this co-operation is the T144DP "Precision for wood" saw blade, which we specially developed for exact angle-cut work results. In conjunction with "Precision Control", it was never easier to achieve such high precision.

	FEATURES	BLADE QUALITY
	for cuts in wood – good and inexpensive	HCS
	quick cut in wood	HCS
	quick cut in hardwood	BiM
	tear-free, clean, fine cuts in wood	HCS
	tear-free, clean, fine cuts in hardwood	BiM
	exact angle cuts in wood	HCS
	quick cut through all wood thicknesses	HCS
	for cuts in metal - good and inexpensive	HSS
	break-resistant for safe cuts in metal	BiM

	FEATURES	BLADE QUALITY
	quick cut through all metal thicknesses	HCS
	for cutting in aluminium, softwood and non-ferrous metal	HCS
	for cuts in stainless steel	BiM
	for cuts in abrasive plastic materials	HCS
	for cuts in fibre and cement materials	BiM
	for cuts in ceramic materials	HCS
	clean, quick cut through acrylic glass	HCS
	for cuts in soft materials	HSS
	universal, quick cut through all wood and metal thicknesses	BiM

THE SPECIAL FEATURES

WITH THAT CERTAIN SOMETHING: BOSCH SAW BLADES AND ACCESSORIES.

The cordless jigsaw GST 14.4 V offers a lot of power in a handy format. Its powerful 48 mm, Bosch manufactured motor allows you to cut through up to 15 running metres in 22 mm chip board with only one battery charge. As the larger GST 24 V, the GST 14.4 V has a stable magnesium gear housing and an aluminium base plate to guarantee a long tool life. And with the staying power of its batteries, the GST 14.4 V belongs to the big Compact Power System.

Jigsaw table MT300 WP: Suitable for all Bosch jigsaws. Both hands are free for the workpiece.
Order no.: 0 603 037 103

Circle cutter with parallel guide: For cutting accurate to a millimetre.
Order no.: 2 607 001 069

Universal cutting oil: Increases the lifetime of metal saw blades by up to 30 %.
Order no.: 2 607 001 409

Dust extractor & hose (19 mm): With the "Plus-clean" system for intelligent, automatic filter cleaning – GAS 50.
