Bring your garden to life with Bosch garden tools.

Our vast range of garden tools, including several new innovative products, makes gardening easier and even more enjoyable than ever before.

Caring for a garden can be demanding. At Bosch we ensure that gardening remains enjoyable by continually developing new solutions with improved performance. For instance, most of our mowers come with grass combs for cutting close to the edge of your lawn. Our new hedge shears, shrub shears and hedgecutters all have our 'Anti-Blocking System' which reduces the risk of stalling and they are lighter and more powerful than most competitors.

Bosch technology.

Whatever job you're doing in your home or garden, Bosch has the tool to help you. Like Bosch Power Tools, Bosch Lawn and Garden is synonymous with innovation, product development and the highest quality. Lithium-ion batteries developed for garden tools can also be used with Bosch Power Tools and you'll find that they are easier to use than ever before, making your home and garden jobs even more enjoyable. For more information go to: www.boschgarden.co.uk

Lithium-ion the facts.

Compact

Over 50% lighter than conventional batteries but with all the power you need.

Reduced self-discharge

Lithium-ion batteries retain their charge whilst stored (in cool, dry conditions).

Fast charging

No more 24 hr charge time – lithium-ion batteries are fully charged after 1–5 hours depending on the battery (Rotak LI battery 80% charged in 30 minutes).

No memory effect

Lithium-ion batteries retain their full charge capacity and can be re-charged up to 4 times more than standard NiCd batteries.

Lawncare

- 5** Range overview
- 6** Rotak cordless lawnmowers (lithium-ion)
- 8** Rotak rotary lawnmowers
- 10** Cylinder lawnmowers
- 11** Lawn raker and verticutter

A beautiful lawn.

Achieve it with Bosch.

The type of lawnmower you need is determined by the size of your lawn and what you use it for, whilst the condition of the lawn determines what further measures should be taken to maintain it.

Electric Rotak rotary lawnmowers from Bosch are available in a range to suit all lawn sizes and powerfully mow even long grass with their Powerdrive™ Motor. Most can cut right up to the edge thanks to innovative grass combs.

Cordless Rotak rotary mowers offer the same power, freedom of movement and energy efficiency but without the need for plug sockets, trailing cables or petrol. Available in 34, 37 and 43 cm cutting widths, the larger Rotak 43 LI comes with two lithium-ion batteries suitable for larger lawn areas. The lithium-ion battery fully charges in 1 hour, and is 80% charged in 30 minutes.

Cylinder lawnmowers allow gardeners to achieve a finer, shorter finish with regular mowing with the compact electric, or energy efficient hand powered models.

Lawncare – To ensure healthy lawn growth, it needs air, nutrients and water. A lawn raker efficiently removes initial moss growth without damaging the grass, but if the moss has already spread, you are best to prepare your lawn for re-seeding with a verticutter.

Rotak lithium-ion cordless lawnmowers.

No petrol, no cable, full power.

The range of Rotak LI cordless mowers with new lithium-ion technology combines all the advantages of petrol and electric but without any of their drawbacks. As powerful as an electric mower, it's up to 40% lighter than traditional cordless or petrol mowers and fully charges in 1 hour. And most importantly, the small amount of energy it requires generates ten times less CO₂ emissions than petrol mowers.

The lithium-ion lawnmower range comes in three different cutting widths:

- ▶ 34 cm (1 battery) for lawns up to 250 m²
- ▶ 37 cm (1 battery) for lawns up to 300 m²
- ▶ 43 cm (2 batteries) for lawns up to 600 m²

More power

As powerful as comparable corded mowers thanks to the powerful 36 V lithium-ion battery

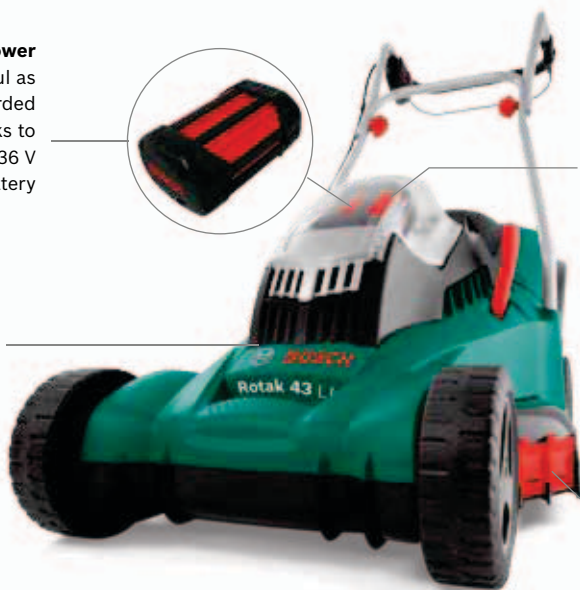

Always ready to use

Reduced self-discharge, no memory effect, fully charged in only 1 hour (80% after 30 minutes)

Lightweight

Up to 40% lighter than traditional cordless or petrol mowers

Innovative grass combs

Cut close to the edge of walls, flower beds and lawns

Complete with
2 batteries

Powerful

Maximum power at the blade thanks to the Powerdrive™ Motor: the innovative reduction gear unit converts the high speed of the motor into enormous torque.

Practical

Various cutting widths and the innovative grass combs reliably ensure that even grass growing close to the edge is guided towards the blades, therefore enabling accurate cutting right up to the edge.

Lightweight

Up to 40% lighter than comparable lawnmowers, with integrated handles for effortless carrying.

Cylinder lawnmower ASM 32.

Precise cutting for a neat lawn.

The Bosch ASM 32 cylinder mower features a 'Quattro-Cut' System to cut grass with a 'scissor like' cut. With cutting heights ranging from 12 to 32 mm and a rear roller, the smooth cut achieved ensures a healthy lawn and smart appearance.

Stylish

Cutting heights from 12 mm to 42 mm and a cutting width of 32 cm.

Accurate

Precise cutting thanks to 'Quattro-Cut' System.

ALR 900 raker and AVR 1100 verticutter.

Achieve a healthy lawn.

Your lawn will only flourish if you regularly free it from moss and thatch. You can remove both of these using the Bosch lawn raker by setting its 20 spring steel tines to the corresponding height from -5 mm to gently comb out thatch without damaging the grass, to +10 mm to collect leaves. For more damaged lawns that may be waterlogged in places or need re-seeding then you need the AVR 1100 verticutter to provide efficient, intensive care for your lawn. The carbon steel blades slit from -10 to +5 mm into the ground, therefore preparing it quickly for re-seeding.

'Jet-Collect' System (ALR 900)

Innovative drum with spring steel tines and airflow inlets quickly and completely removes thatch and moss

'Jet-Collect' System (AVR 1100)

Innovative drum with carbon steel blades and airflow inlets quickly and completely removes the layer of thatch consisting of plant debris, moss and weeds from the lawn

Compact storage

Cutting lawn edges

- 13 Range overview
- 14 Cordless grass trimmers
- 16 Electric grass trimmers
- 18 Cordless edging shear

Neat lawn edges.

A made-to-measure range.

To put the finishing touches to your lawn you will need to trim the areas that your lawnmower cannot reach and we have tools to suit.

The bigger and more complex your garden is, the more you have to work to maintain the lawn edges along paths, walls, fences, corners and around stones, shrubs, trees, flower beds. Bosch offers cordless and corded grass trimmers to help you with this.

Corded grass trimmers provide high power and cutting diameters of up to 30 centimetres. They give good results in little time whilst cordless grass trimmers offer the greatest freedom of movement, are not dependent on a plug socket and are low in weight.

Whether cordless or corded, this comprehensive selection of tools ranges from standard models to more sophisticated grass trimmers with 90° rotating cutting head, height-adjustable telescopic handle and plant protector.

If you only need to cut small corners or sections of the lawn, then all you need is a set of grass shears. The compact, handy Bosch Isio with cordless lithium-ion technology is very lightweight and cuts edges of your lawn precisely. A telescopic handle is available as an accessory, which enables you to cut without having to bend down.

Cordless grass trimmers.

Cordless power up to 1000 metres.

With no cable to untangle or trip over, these cordless grass trimmers from Bosch allow complete freedom of use away from a power source. Available in 23 cm and 26 cm diameter cutting widths, they use an innovative polymer blade cutting system, which is energy efficient and ensures an accurate cut.

Flexible and ergonomic

Adjustable for additional convenience.

Convenient and powerful

Edge up to 1000 metres with one battery charge. A short charge time of just 3 hours makes this 2.4 kg lightweight tool always ready to use.

Adjustable

34 cm height-adjustable telescopic handle, 90° rotating cutter head for fast edging and effortless trimming.

Balanced design

Easy ergonomic handling due to perfectly balanced design.

Versatile

Two spools, one for normal grass and one with extra-strong line for more stubborn growth (ART Combitrim).

Flexible and ergonomic

Whether horizontal trimming or vertical edging – the attachable wheels ensure easy use in any work position (ART Combitrim 30).

Isio cordless edging shear.

Compact and lightweight.

Compact and lightweight with high-quality Swiss blades and lithium-ion technology, the Isio gives up to 50 minutes cutting on a single battery charge. The telescopic handle accessory makes the Isio even more convenient.

Anti-Blocking System
Micro-electronics adjust the running direction of the blades to powerfully cut through and prevent stalling.

Telescopic handle
Connect the edging shear to the telescopic handle for ease of use.

New charge cable
Easy charging with mobile phone-type charge cable.

The perfect tool for reaching those hard-to-get-at areas of grass.

Shrub and hedge care

- 21 Range overview
- 22 Cordless hedgecutters
- 24 Electric hedgecutters
- 26 Pro hedgecutters
- 27 Cordless hedge shear
- 28 Cordless shrub shear
- 29 Cordless secateur

Shrubs and hedges in good shape.

The best tools for trimming, shaping or cutting.

Shrubs and hedges are easy to maintain and regular cutting is by far the most important way of looking after them.

It is essential that you choose the right tools to do this. The Isio is a great choice for creative shaping of evergreen, small leafed plants such as box, yew and privets.

The new ASB hedge shear with a 20 cm blade is still compact and lightweight for ultimate agility. You'll find the ASB hedge shear the perfect tool for shaping your shrubs and young hedges just the way you want them, and with the 'Anti-Blocking' system too.

Cordless hedgecutters offer more freedom of movement and remove the risk of cutting through a cable. They are very lightweight and their innovative 'Anti-Blocking' system prevents virtually any chance of stalling. And now there's the new AHS 54-20 LI with a 36 V lithium-ion battery for larger, tougher hedges away from a power source.

A complete range of cordless and corded hedgecutters are available for maintaining your hedges. Corded electric hedgecutters come in a range of tooth spacing from 8 mm for Box (Buxus) to 16 mm for privet and other young hedges, through to 34 mm for mature hedgerows.

Choose the required tooth spacing based on the branch thickness of your hedge and when doing so, remember that a hedge will grow. If in doubt, choose the next tooth spacing up. The height and depth of the hedge are important too, and selecting a longer blade length will not only get the job done faster, it will also avoid the need to use a ladder if the hedge is quite tall.

Use the Ciso cordless secateur to prune branches and twigs. Due to their Bosch lithium-ion batteries, all of these products are conveniently lightweight and enable comfortable cutting with minimal effort.

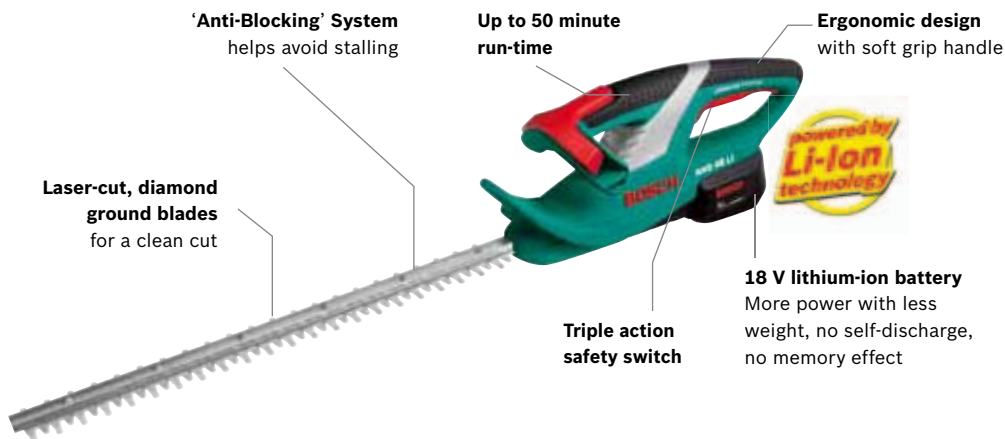

AHS 54-20 LI cordless hedgecutter.

Cordless mobility and maximum power.

Cordless hedgecutters make work easier for you. They allow the freedom to roam and re-charging is a simple process. Thanks to lithium-ion's 'less weight – more power' technology, some hedgecutters weigh as little as 2.2 kg, and only up to 3.5 kg for the largest model in the range. All the lithium-ion versions are fitted with our 'Anti-Blocking' system, to avoid stalling and the blades are all laser cut and diamond ground for extra sharpness.

Cordless freedom

Ends the hassle of untangling and the risk of cutting the cable. Weight of only 3.5 kg for effortless cutting of medium leafed hedges.

Always ready to use

The AHS 54-20 LI has a 36 V lithium-ion battery, interchangeable with other Bosch tools. Fully charged in only 45 minutes (80% in 25 minutes)

Anti-Blocking System

Innovation

Where other hedgecutters stop working, 'Anti-Blocking' System ensures continuous cutting performance.

Electric hedgecutters.

AHS 4-16, 42-16, 48-16, 52-16 & 63-16 C.

Comfortable, capable cutting. Hedgecutters are available in a range of blade lengths and tooth spacing. It is important to select one that will adequately cope with the height and density of the hedge to be cut. Frequent, seasonal trimming of hedges will ensure good, new growth and with all blades being diamond ground, a clean cut is assured.

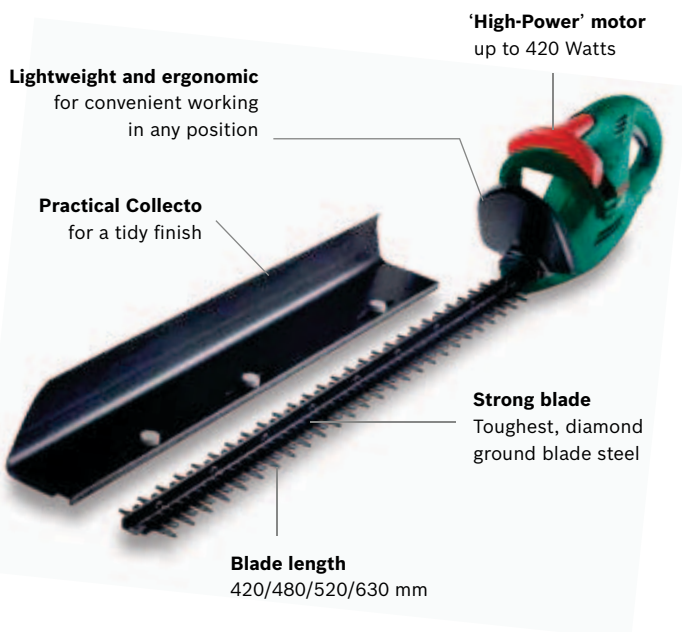

Outstanding cutting performance

High-speed motor and quality, diamond ground blades.

Extremely user-friendly

Low weight and high handle ergonomics for convenient working in any position.

New! ASB 10.8 LI hedge shear.

Single handed hedge shear for ultimate agility.

Outstandingly compact and weighing only 900 g, the ASB 10.8 LI is highly manoeuvrable giving you complete control and more than enough strength and power to help you shape your young hedges and shrubs just the way you want them.

World's first

Where other products stop working, the electronic anti-stall device 'Anti-Blocking' System ensures continuous cutting.

Cordless freedom

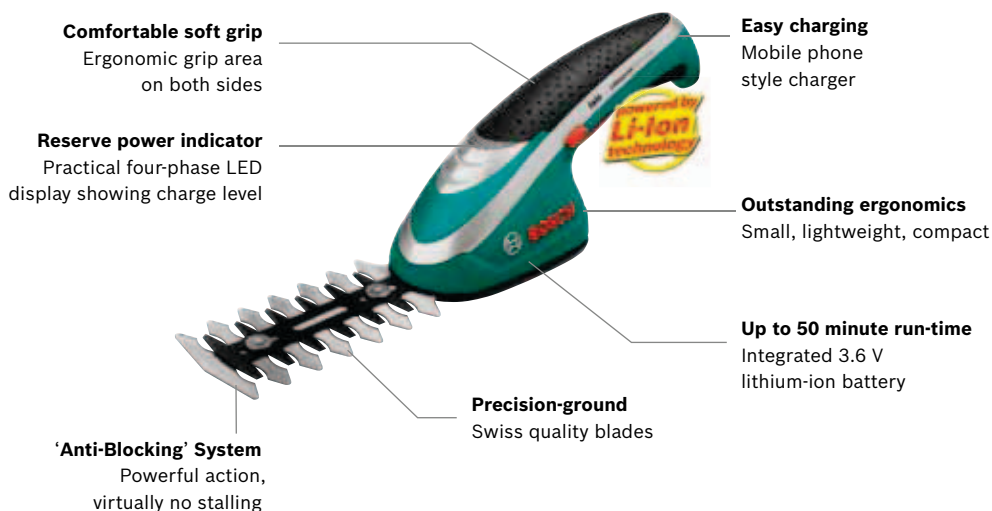

Weighing only 900 g for effortless cutting of bushes and small leaved hedges, without the hassle of a cable.

Isio shrub shear.

Compact and lightweight – for effortless shaping of bushes and small leafed shrubs.

This compact and lightweight lithium-ion shrub shear offers power and performance. Its precision ground quality blades with 110 mm blade length and 8 mm tooth spacing are perfect for shaping shrubs and small hedges without stalling and its outstanding ergonomics also make it easier to work in hard-to-reach areas.

Compact and lightweight

Weighing only 550 g, it is up to 50% lighter and 40% smaller than conventional shrub shears.

Ciso cordless secateur.

Pruning made easier.

The world's first cordless secateur with integrated lithium-ion battery, the Ciso makes clean cuts 'at the squeeze of a trigger', enabling more than 500 cuts with one battery charge. Soft wood up to 14 mm and hard wood up to 9 mm in diameter, the Ciso gives a clean cut due to the bypass cutting system. The ergonomically designed secateur weighs only 590 grams and does not tire you out, even if used for lengthy periods of time.

Strong performance
Patented 'Power-Blade' System for effortless pruning with a cutting diameter of up to 14 mm.

Bosch Lithium-Ion Technology
No self-discharge, no memory effect and always ready to use. Delivers on average 500 cuts of 9 mm soft wood (fresh wood) with one battery charge.

Wood care

- 31** Range overview
- 32** Electric chainsaws
- 34** Pro electric chainsaws
- 36** Shredder technology
- 37** Impact shredders
- 38** Quiet shredders

Neat, tidy and eco-friendly.

Chainsaw and shredder territory.

The right chainsaw and shredder will help you to maintain a tidy garden.

The selection of a chainsaw should be based on power, chain speed and frequency of use. If you only use a chainsaw occasionally, choose one of the models from the S range. But, if you use a chainsaw often, choose the Bosch Pro model. All Bosch chainsaws are equipped with a rapid stop kick-back brake and have the advantage of being easy to use and are extremely powerful.

Shredders are needed to convert branches, cuttings and prunings into 'gold for the garden'. Once shredded, the residual debris can be used as coarse compost layers, or as a direct garden mulch dependent on the nature of the green material, or at the very least, a reduced volume for recycling.

The Bosch Rapid shredders are ideal for gardens consisting mainly of shrubs, foliage plants and smaller branches whilst the quiet shredders with drum cutting mechanisms are ideal for old hedges and a lot of wooden green material.

The new 'Turbine-Cut' System is perfectly suited to shred all types of plant material. They shred both green material and hard wood very competently and provide the best material mix for composting.

Electric chainsaws.

The AKE 40.

The versatile and easy to use AKE 40 chainsaw is low in weight and enables easy handling and freedom of movement. The 1800 Watt motor and 9m/s chain speed allows for a clean faster cut whilst the rapid-reaction kick back brake is 30% faster than safety standards recommend.

The AKE S range.

The AKE S electric chainsaw range features simple, tool-free chain assembly and tensioning. The kick-back brake operates in less than 0.1 second, enabling the chainsaws to stop 30% faster than safety standards recommend. The large steel gripping teeth allow for good leverage, accurate cutting and reduced possibility of kick-back.

Shredders.

Why not turn your garden debris into something useful like mulch or compost?

Trips to the tip soon become tedious, and as many people are unsure if its legal to have a bonfire in the back garden, this debris mountain soon piles up.

Cutting blade

- ▶ Ideal for green, soft material.
- ▶ Bosch Powerdrive™ Motor for high speed material throughput
- ▶ Laser-cut precision blade made of specially hardened steel for a high cutting performance.
- ▶ Cutting capacity of up to 40 mm

Drum cutter

- ▶ Do you want to shred without waking the neighbours?
- ▶ Ideal for hard wood in fruit trees, old hedges and thorny shrubs
- ▶ Branches of up to 40 mm in diameter
- ▶ Automatic feed
- ▶ Cuts and crushes in one go

Turbine shredder

- ▶ Do you want to shred your garden waste without having to separate green material from wood?
- ▶ Ideal for all wood and green material up to 45 mm dia.
- ▶ Has 8 blades which rotate, virtually ruling out any possibility of stalling
- ▶ Work is a lot quicker due to the patented fast feed hopper and automatic feed for fast material throughput

AXT Rapid 2000 & 2200.

Razor sharp – for fast shredder performance.

Ideal for green material. If you mainly have to shred green, soft material, then you should use the Rapid shredder. It has the impressive Bosch Powerdrive™ Motor for high material throughput, a laser-cut precision blade made of specially hardened steel for high cutting performance, and approximately seven times better cutting power than its competitors. It really does its name justice.

Cutting blade
The Powerdrive™ Motor helps the blade deliver a material throughput of up to 90 kg/h with up to 40 mm cutting capacity.

Cleaning

- 41 Range overview
- 42 Aquatak GO
- 43 Aquatak Comfort
- 44 Aquatak Clic
- 45 Aquatak 160 X
- 46 Aquatak Accessories

Cleaning made easy.

High-pressure washers.

Bosch offers you a wide range of high-pressure washers, each with a variety of different features. They differ from each other in terms of motor power and flow rates with water pressure from 100 to 160 bar. When choosing a high-pressure washer, you should base your decision on the type of cleaning work you intend to do and whether it is frequent or occasional.

The toughest tasks require the strongest water pressure of 150 to 160 bar. An Aquatak 160 X is ideal for this. To clean large surfaces you will require a model with 125 to 140 bar such as an Aquatak Clic which insures a high level of flexibility due to its 'Torsion-Flex' high-pressure hose and 'Easy-Roll' rewind system. 100 to 125 bar are good for occasional use around the house and garden and if you need to be especially mobile when doing them, then choose the compact Aquatak Go on four wheels and a maximum of 100 bar.

A selection of integrated and auxiliary accessories make your high-pressure washer even more versatile. With the correct accessories, you can wash the car underbody, clean drainpipes or even sandblast to remove rust.

Aquatak Go high-pressure washers.

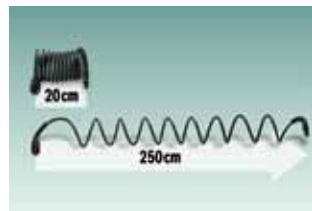

Small, mobile and powerful.

The lightweight, compact, four-wheeled Bosch Aquatak Go Plus follows you to wherever you need to clean: patios, paths, steps. It comes complete with a lance and an accessory bag (Go Plus only). Weighing only 3.9 kg, it is one of the lightest high-pressure washers in its class. The Aquatak Go is ideal for convenient transport, greater freedom of movement and enjoyable cleaning.

Aquatak Clic high-pressure washers.

Set up and packed away in seconds.

Do you want to clean as conveniently as possible without the hose buckling or knotting, and without having to continuously change the lance or coil up the cable? Then the Bosch Aquatak Clic is the ideal solution. It has many innovations such as kink-free 'Torsion-Flex' high-pressure hose, a 4-Jet lance and 'Easy-Roll', all of which make the Aquatak Clic high-pressure washer range easy to tidy away as they are to clean. The powerful motors and a water flow rate of up to 470 l/h at a water pressure of up to 140 bar provide impressive cleaning power.

7 m hose extension	160 X	F 016 800 196	3165140.350310
8 m drain cleaner	160 X	F 016 800 228	3165140.357029
Universal adapter set	High-pressure washers from other manufacturers	F 016 800 198	3165140.350334
Adapter for Kärcher accessories	All Aquatak models ¹	F 016 800 226	3165140.357005
Alloy-wheel cleaner 0.75 l	All Aquatak models	F 016 800 229	3165140.357036
Car cleaner 0.5 l	All Aquatak models	F 016 800 236	3165140.357616
Glass cleaner 0.5 l	All Aquatak models	F 016 800 235	3165140.357609
Insect remover 0.75 l	All Aquatak models	F 016 800 230	3165140.357043
Polishing wax 2.5 l	All Aquatak models	F 016 800 233	3165140.357586
Patio cleaner 0.5 l	All Aquatak models	F 016 800 237	3165140.357623
All-purpose cleaner 2.5 l	All Aquatak models	F 016 800 231	3165140.357562
All-purpose cleaner 0.5 l	All Aquatak models	F 016 800 232	3165140.357579

¹ Except for Aquatak 160 X.

² Except for Aquatak Clic.

³ Not recommended for Aquatak Go/Go Plus.

Always one step ahead with Bosch.

Pioneering innovations for gardening work.

Bosch is permanently developing new products specifically tailored to suit the needs and wants of users. They offer solutions to help make everyday gardening tasks easier, faster and more convenient. A small selection of these pioneering innovations can be found on this page. You can read more about this on the internet at www.boschgarden.co.uk

Bosch Lithium-Ion Technology

Bosch Lithium-Ion Technology enables you to make use of the latest technological developments. Bosch perfectly combines state-of-the-art lithium-ion technology with optimised motors and electronic components, such as the innovative cell protection, to ensure longer battery run time and efficient, powerful cordless garden tools. Bosch was the first to offer cordless garden tools with lithium-ion technology and now has a complete range from secateurs to lawnmowers.

'Efficient Energy Management'

This increases the run time of the lithium-ion batteries in the Rotak LI by 10 to 20%. The intelligent cutting electronics deliver exactly the required amount of energy to suit the length and density of the grass, and keep the blade rotation speed constant. And when the motor is switched off, the energy recovery system converts the energy generated by the blade run-down motion into electrical energy, which is fed back into the mower's battery.

Innovative Grass Combs

Wider than the front wheels of the lawnmower, the innovative grass combs enable cutting of grass growing close to the edge due to their special design. This ensures that no strips of uncut grass are left behind, even when cutting along flower beds, walls or paths.

Patented 'Jet-Collect' System

The innovative drum with stainless steel blades or spring steel tines and airflow inlets completely removes thatch, moss and weeds. The shredded waste is pressed into the collection box by a powerful airflow that prevents clogging.

Powerdrive™ Motor

The innovative reduction gear unit converts the high speed of the motor into enormous power. If it is slowed down by resistance, the torque automatically increases and the motor continues to work powerfully, even under difficult conditions and high load.

Electronic 'Anti-Blocking' System

If a thick branch cannot be cut through immediately, the innovative micro-electronics detect this and instantly adjust the running direction of the blades to continue cutting powerfully through wood where other tools would stall.

Patented 'Power-Blade' System

The trigger system specially developed by Bosch combined with the bypass cutting system consists of a fixed guiding blade without sharp edges and an extra-sharp, moving blade positioned further back. It prevents unintentional cuts and allows for a safe, superbly smooth and fibre-free cutting result up to 14 mm in diameter.

Effective 'Turbine-Cut' System

This newly developed turbine cutting mechanism makes it possible to shred greenery and hard wood together. 8 rotating blades in conjunction with the hopper design enable optimum automatic feed and extremely fast material throughput of up to 230 kg/h. This combination ensures efficient work with virtually no stalling, regardless of the garden material processed.

Turn a house and a garden into your home. With Bosch Lithium-Ion Technology.

If you've used any of Bosch's lithium-ion garden tools and know about their many benefits, you'll be pleased to know that there's a lot more waiting for you in Bosch's DIY power tools range. In fact, much of Bosch's experience in bringing lithium-ion powered garden tools to market, such as cordless hedge trimmers, shears and the world's first lithium-ion powered lawnmower, the Rotak LI, was jointly acquired in the research and development of this comprehensive range of innovative tools.

Bosch has continued to develop and launch lithium-ion powered tools that make DIY projects easier and more enjoyable to take on. Bosch's Uneo, for example, is very versatile, allowing you to drill, screw and hammer with just one tool. And Bosch's lightweight and compact IXO, the world's first cordless screwdriver to be powered by a lithium-ion

battery, is handy for any project requiring intricate fixing.

Many of Bosch's DIY tools are ideal for outdoor projects. Another benefit to choosing Bosch is that the lithium-ion batteries on selected garden tools are interchangeable with those on certain Bosch power tools, meaning you can complete any job without losing valuable time.

As Bosch offers such a wide range of tools featuring this leading technology, you can embark on any project knowing that there'll be a Bosch tool packed with all the features you need. So whether you're drilling the decking or sanding it down, mowing the lawn or tidying up your shrubs and hedges, Bosch's cordless tools with innovative lithium-ion technology offer unbeatable advantages and make house and garden projects a real pleasure.

Lithium-ion technology

at a glance:

Compact, durable and quickly recharged

Due to their short charge times, Bosch cordless tools with lithium-ion technology are ready to use quickly. They are also especially durable and last six times longer than conventional nickel cadmium batteries.

Full power at all times

Reduced self-discharge, no memory effect: constant battery capacity over the entire lifetime. Always ready when you are thanks to lithium-ion technology.

Battery charge after four months on standby.

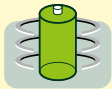

Same power at half the size

Due to the lithium-ion technology, the size and weight of the batteries are reduced by approx. 60% compared to conventional nickel cadmium batteries – although they offer the same amount of power.

Less weight, more power

Bosch cordless tools with lithium-ion technology impress with their very compact design, low weight and ease of use. This saves you a lot of effort when working.

Long lifetime

The intelligent Electronic Cell Protection, Bosch ECP, protects the lithium-ion batteries against excessive temperatures and overload, therefore giving them a particularly long lifetime.
