

GARDEN CATALOGUE 2012

WELCOME TO THE UK FISKARS CATALOGUE 2012

The Garden Industry has faced a challenging year. In 2012 our ambition is to become your No.1 garden supplier for customer service, we are committed to providing a high service to you all of the time. We are undertaking a top to bottom review of our customer processes and service standards. As the project progresses, we will feed back to you, the changes that we are making and keep you updated on our progress to achieve our goal to be the No.1 garden supplier for customer service.

Our No.1 priority is you.

Andrew Smith
Managing Director
Fiskars UK Ltd

A QUALITY STORY FROM 1649

In 1649 Peter Thorwöste was granted permission to manufacture cast iron and forged products in a small Finnish village called Fiskars. His company soon became famous for high quality steel and steel products.

In 1967 Fiskars launched its iconic orange-handled scissors, pioneering a revolutionary manufacturing process, ergonomic handles and innovative blades that offered precision, comfort and durability far superior to its peers. Nowadays a must-have in households worldwide, the orange scissors are symbolic to Fiskars commitment to exclusive quality and innovative design.

Fiskars Innovation & Quality since 1649

Fiskars has over 352 years of experience in manufacturing high quality products.

Our products are designed with durability and exceeding our consumer expectation in mind. The result is a range of products that will last a gardener many happy gardening seasons.

According to the strict Finnish standards for design, Fiskars has a history of using only exclusive quality, durable materials for the finest end result. Before entering the market, each product stands subject to extensive operational tests, where blade sharpeners and maintenance kits ensure the best performance and preservation of frequently used tools. With peace of mind, Fiskars guarantees the quality of all of its products.

A lifelong commitment to quality

Quality has always been one of Fiskars' core values, to which the company stands firm on having a holistic approach throughout its entities and throughout the product's lifecycle. Delivering a quality end product is merely the basis that extends into top service levels for customers and consumers alike.

Anytime.....anywhere

When properly used and maintained, Fiskars garden tools shall remain free of defects in material and workmanship. Any exception to the rule will simply be repaired, replaced or substituted by a product of equal value. Replacement tools or spare parts are offered when returning the tool to the retailer, or contacting the local customer service department.

Reliability

Fiskars is dedicated to ensuring you receive the best possible Customer Service. Our customer care team lead by Nina Labbate, are only a phone call away, to help you with your questions.

PACKAGING

Inside the Packaging

Inside the packaging there is further information to help you get to grips with your new tool.

Product Names

Fiskars products are named using letters and numbers. The letter refers to the product and the number represents which of our Supreme, Dynamic and Essential range it belongs to.

Letter

P – Pruner
L – Lopper
W – Weeder
S – Spade

Number

Essential: 01 - 39
Dynamic: 40 - 79
Supreme: 80 - 100+

P26

Supreme Dynamic Essential

All Fiskars products are ranked as either Supreme, Dynamic or Essential. This is represented on our packaging numerically and through colour coding in the top right hand corner.

Supreme Dynamic Essential

Product Technology

This is where we list our award winning technology. Fiskars garden tools have long been recognised for their superior quality, design and innovation.

PowerStep™

PowerReel™

Pictograms

Product benefits and features are visually described using icons.

The icons fall into 3 categories:

1. Usage – what the product should be used for
2. Material – what the product is made of
3. Features – what defining features the product has

Usage

Material

Features

PRUNERS

Fiskars pruners are ergonomically designed for comfort and ease of use and are recognised as best in category by many gardeners and industry experts for value and performance. Their ergonomic handles are made of extra durable synthetic materials and the stainless steel blades are secured by an easily accessible locking mechanism when the pruner is not in use.

UNIVERSAL CUTTERS

Fiskars Universal Garden Cutters are multi-use tools that allow accessibility to tree crowns and dense bushes, enabling the gardener to trim overhead without needing a ladder or at ground level without bending or kneeling. Activate the great cutting power with a slide of the orange handle, or when used at maximum height, with a pull of the orange ended knob. The adjustable head and the lightweight cutting mechanism helps to ensure fast, easy and safe pruning.

REEL MOWER

Reel Mowers promote greener, healthier lawns by cutting each blade of grass cleanly with a scissor like action. This minimises moisture loss and exposure to disease. The Reel Mower lets you cut grass without noise, uncomfortable vibrations and the hazards associated with power driven rotary blades. It is also the most environmentally friendly way to cut your lawn.

Momentum™

WEED PULLER

The Fiskars Weed Puller is a great invention for removing weeds such as dandelions. Its simple design removes the need for digging, bending or the use of chemicals. Its deep reaching claws grab the root from all directions and remove the weed cleanly, removing only a small amount of soil.

reddot design award
winner 2004

Weed Puller

Weed Puller W52

Article No 139910

Product benefits

- < Four deep-reaching stainless steel claws grab the root efficiently
- < Ejection system helps to release weed after pulling
- < Eco-friendly weeding without the use of chemicals
- < Allows the gardener to work in an upright position to prevent muscle strain and backache
- < Winner GIMA Product of the Year 2011

GARDEN DRILL

The Fiskars Garden Drill is not only a useful construction tool it also makes many everyday garden tasks simpler. It is the best tool for the job when planting flowers or bushes and also when aerating and fertilising the ground. It comes in three sizes so you can pick the right size to suit specific garden tasks.

Fiskars QuikDrill™

QuikDrill S	Article No 134710	Product benefits
 		<ul style="list-style-type: none"> < For planting bulbs, aerating and fertilizing soil and installing small posts < Drills a smooth edged hole without getting stuck on small stones or roots < Handle made from FiberComp™ (a fiberglass reinforced polyamide) to make it extremely strong < Steel tube shaft for maximum strength < Dual cutting action with two optimally angled and sharpened blades < Plus Parts are attached to the shaft with screws < Working diameter 100mm
QuikDrill M	Article No 134720	Product benefits
 		<ul style="list-style-type: none"> < For perennial planting, aerating and mixing compost and installing medium sized posts < Drills a smooth edged hole without getting stuck on small stones or roots < Handle made from FiberComp™ (a fiberglass reinforced polyamide) to make it extremely strong < Steel tube shaft for maximum strength < Dual cutting action with two optimally angled and sharpened blades < Plus Parts are attached to the shaft with screws < Working diameter 150mm
QuikDrill L	Article No 134730	Product benefits
 		<ul style="list-style-type: none"> < For planting hedges and trees, drilling a compost holes and installing large posts < Drills a smooth edged hole without getting stuck on small stones or roots < Handle made from FiberComp™ (a fiberglass reinforced polyamide) to make it extremely strong < Steel tube shaft for maximum strength < Dual cutting action with two optimally angled and sharpened blades < Plus Parts are attached to the shaft with screws < Working diameter 200mm

Plus Parts

- < Switch easily between different garden tasks thanks to Fiskars QuikDrill Plus Parts
- < The blades come in 3 sizes and can be combined with any Fiskars QuikDrill shaft
- < The interchangeable blades extend the usage of the original Fiskars QuikDrill to versatile garden tasks from the perennial planting to aerating soil
- < Spare parts come with an Alan key

Plus Parts in 3 different sizes:

FISKARS QUIKFIT

Fiskars QuikFit™ is a range of products with interchangeable heads and handles for a variety of garden tasks from cutting to cultivating and from raking to snow care. The Fiskars QuikFit™ locking mechanism allows the gardener to lock, unlock or eject easily the heads in one swift movement.

reddot design award
winner 2010

Fiskars QuikFit™ Locking system - winner of the Red Dot Award: Product Design 2010.
The QuikFit™ mechanism ensures effortless change of heads for rakes, cultivators, hoes, weeders, saws etc.
The heads attach to the shaft and the device is immediately ready for your use.

Cultivator Heads

3 Prong Cultivator	Article No 136511	Product benefits
		<ul style="list-style-type: none"> < For cultivating, scarifying, aerating and breaking up soil < Suitable for seed bed preparation and maintenance < Hardened carbon steel blade < Can be used with all standard and small shafts

EDUCATION

CHOPPING VS. SPLITTING

Chopping axe: The Axe X15 Chopping Axe's thin, wide edge ensures a clean, easy cut in fresh, resinous wood, like spruce or pine.

Splitting axe: The Axe X17 and X25 Splitting axe features a unique cutting edge that easily slices into the wood, which the thick axe blade then pushes apart.

ANVIL VS. BYPASS

Bypass: Both blade and counter blade press into the wood to make a clean cut with less compression damage (cutting blade bypasses counter blade in a scissors-like action). Possible to cut close to the stem. Best suitable for fresh wood.

Anvil: Upper blade is forced through the wood with greater pressure as the anvil blade supports the branch and spreads the pressure until the cut is complete. Best suitable for dry or dead wood.

WHICH TOOL FOR WHICH TASK

By selecting the right tool for the job you save energy and ensure the wellbeing of your plants.

PICTOGRAMS

EaseCut™

Ease Cut™
Indicates how many times the cutting power is multiplied by.

Usage Area

Bypass blade
For cutting fresh, living growth.

Anvil blade
For cutting dry hard growth.

Snip blade
For cutting thin steel plates, plastic, tube, rope etc.

Hook Head
For heavy cutting of fresh wood.

Scissor head
For precision cutting of fresh wood.

Splitting axe
For easier, faster splitting of wood.

Chopping axe
For easy cutting through fresh, resinous wood.

Brush hook
For trimming undergrowth and even small trees.

Efficient toothing
For cutting new or live wood.

Fine toothing
For a clean cut of dry wood.

Product Material

FiberComp™
Strong/durable and lightweight properties.

PBT
Lightweight, flexible and hardwearing.

Boron steel
Sharp and durable

Stainless steel
Mechanically strong and corrosion resistant.

Aluminium
Lightweight, strong properties.

CrMov
Highly durable and stays sharp.

Steel gear mechanism
Strong and effective steel mechanism.

PTFE coating
Corrosion resistant, nonstick blade coating.

Genuine leather
Made of tough genuine leather.

Product Features

Cutting capacity
Shows the maximum cutting diameter.

Spare parts
Spare parts are available.

Plus parts
Can be expanded with additional parts.

Shock-proofed
Improves comfort by absorbing the vibrations.

Softgrip™
Comfortable SoftGrip™ handle.

Power tip
Cutting power is distributed evenly.

Micro tip
Thin and sharp blades for precision cutting.

Safety
Loop helps to shield fingers when cutting.

Telescopic
The length of the product can be adjusted.

Female
For female use.

Male
For male use.

Weather proof
Withstands all types of weather.

Vegetables
For cutting and picking vegetables.

Flowers
For cutting flowers.

Grass
For cutting grass.

Hedges and bushes
For cutting of hedges and bushes.

Pot plants
For cutting of pot plants.

Bonsai plants
For cutting bonsai plants.

Herbs
For cutting of delicate herbs.

Fish
For cutting fish.

Hand size
Suitable for small hands.

Ambidextrous
For both right-handed and left-handed use.

Right handed product
For right-handed use.

Grafting
For cutting of small side shoots, laterals and pruning of weak growth.
Building site
For cutting of rockwool and fibers.

Carving
For peeling bark.

Grafting
For various grafting tasks/

Sharpening wooden canes

Cotton & string
For cutting cotton and strings.

Flower stems
For cutting flower stems.

Tight sealing
Shaft and blade are fused together for a tight seal.

Fingerloop handle
Prevents slipping and protects fingers.

Center of gravity
Perfectly balanced.

Strength
Withstands hard wear and loads of up to 35 kg loads.

QuikFit™
QuikFit™ system

Bow Saw teeth
For sawing with a push and pull motion.

Garden Saw teeth
For sawing with a pulling motion only.

Building Saw teeth
For sawing with a pulling motion only.

Wool Saw teeth
For sawing with a push and pull motion.

Grip
Ergonomic handle with a firm, non-slip grip.

Pocket-sized
Fits easily into a pocket.

Made in Finland

Founded in the small village of Fiskars, Finland 1649, the company has grown into a large multinational corporation, celebrated for a history of products accommodating the strict Finnish standards for quality and design. Following its tradition to drive innovation of tools that reduce the effort, fatigue and strains so often associated with gardening, Fiskars ergonomic, high performance cutting and landscaping tools are designed to do the hard work, so you don't have to!
