

**GARDENA LAWN CARE 2013**

# EXACTLY WHAT YOUR LAWN NEEDS

Live your garden.

 **GARDENA®**

# GARDENA LAWN CARE

High-quality products. Beautiful gardens.

## Contents

### GARDENA Lawn care

#### Mow the lawn

The first step for a beautiful lawn is a regular cut. Simply select the right GARDENA model for your demands.

More on page ..... 4

#### Trim

Lawn edges remain wherever a lawnmower cannot reach. Using a trimmer in difficult-to-access corners and edges gives the lawn a perfect appearance. Electric or battery-powered trimmers quickly and comfortably shorten edges.

More on page ..... 7

#### Trimming lawn edges

A lawn looks harmonious when the edges have been adjusted to the lawn height. For this work, GARDENA offers manual, battery-powered and electric grass shears.

More on page ..... 7

#### Aerate and rake

A beautiful lawn needs to breathe. Lawn aerators and rakes provide oxygen deep into the soil and keep your lawn sustainably free of weeds, moss and thatch.

More on page ..... 9

#### Seed and fertilise

There are times when your lawn needs support: e.g. after extreme weather periods or strong use. The GARDENA spreader can then help with seeding and fertilising.

More on page ..... 10

#### Lawn care

Pulling weeds, removing leaves or grass clippings is easy – when the right tools are at hand. GARDENA has the right solution for every task and the right product for every garden task.

More on page ..... 11

**GARDENA – the full-range supplier**  
GARDENA offers everything you need for optimal garden care. Whether products for lawn-, tree- and shrub care, tools for soil cultivation, irrigation solutions or pumps – GARDENA's assortment has it all. For a perfect garden.

**GARDENA – with system**  
The system concept characterises GARDENA's products and is reflected in many product series. You can rely on our systems. Once GARDENA – always GARDENA.

**GARDENA – in any season**  
With GARDENA products, you care for your lawn all year round and keep it in excellent shape – regardless of the season.

#### GARDENA – your advantages

**1. Quality**  
GARDENA products are known for their extremely high quality and reliability. The entire production chain is subject to the strictest inspection cycles and quality guidelines.

**2. Innovation/Technology**  
GARDENA develops products that render garden work as easy and efficient as possible. That's why the product portfolio is continuously further developed and optimised – with the latest technology.

**3. Ergonomics/Comfort**  
GARDENA places high value on the ergonomics of their products. They should lie comfortably in the hand and make garden work easier.

**4. Service**  
Should your product require repair or maintenance, the GARDENA Service experts are there for you.

# GARDENA LAWN CARE

So that your lawn will be even more beautiful.

## Mow the lawn

Not all lawns are the same. Regardless of what demands you place on your lawn, the right care is vital. Long term measures at the right time will make your lawn the jewel of your garden.

### Why?

Regular mowing stimulates the growth of the lawn, increases the grass density and thereby the lawn's beauty.

### How?

Minimal but frequent mowing is often better than seldom, strong mowing. With each cut, as the rule of thumb goes, the grass blade should be shortened by about a half to two-thirds, to approx. five centimetres. In midsummer, you should let the grass remain somewhat longer so that it can better withstand dry periods. And if you have neither time nor the desire to regularly mow the lawn yourself, a Robotic Lawnmower may be the perfect solution.

### When?

The lawn mowing season begins in March/April when the climate is mild and the lawn length approx. 8 cm. Ideal mowing conditions are rain-free days with an overcast sky and dry lawn. The best time to mow is before noon. Alternately, you can get to work in the early evening hours. At the end of October, before the first frost, you should mow one last time before the winter break.

### How often?

For an even lawn result, mowing once a week in the main growth period is recommended.

### GARDENA TIP

With each mowing session, change the mowing direction and pattern. This will give an even cut appearance and a perfect lawn.

## Overview of lawnmowers.

A healthy lawn is a part of any beautiful garden. Mowing is one of the most important tasks for this. Only frequent mowing ensures a lush and thriving lawn. Whether you have a small- or large area – GARDENA offers you a large variety of lawnmowers. You're sure to find the right model that is suitable for your garden.

### GARDENA Robotic Lawnmower

- Mows the lawn all by itself
- Returns to the charging station on its own
- A perfectly cared-for lawn at all times thanks to the razor-sharp blades

### GARDENA Cylinder Lawnmowers

- For highest demands
- Cutting cylinder and bottom blade do not touch
- A perfect cut, as with shears – golf-course quality

### GARDENA Rotary Lawnmowers

- For normal cutting-quality demands in the home- and allotment gardens
- Horizontally rotating blade unit captures the grass stalk and cuts it off
- Larger areas can be mowed in a short time

## GARDENA Robotic Lawnmower

Never mow the lawn yourself again

With the GARDENA Robotic Lawnmower, time consuming lawn care becomes relaxation. While you enjoy your free time, the Robotic Lawnmower takes over the bothersome work all on its own. Lawn mowing has never been easier and more convenient.

- Mows the lawn on its own and independently recharges at the charging station
- Daily mowing and mulching ensure a perfectly cared-for lawn and save the removal of grass cuttings
- The boundary wire defines the lawn area to be mowed (max. 700 m<sup>2</sup>)
- Easy installation and initial operation
- Low-noise, emission-free and energy-saving
- Theft-protected through PIN code and alarm function

For small, simple lawn shapes  
R40Li for up to 400 m<sup>2</sup>

Article No. 4071

For large, complex lawn shapes  
R70Li for up to 700 m<sup>2</sup>

Article No. 4072

NEW

Li-Ion  
POWER

All products and more info at:  
[www.gardena.com](http://www.gardena.com)

### Hand Cylinder Lawnmowers

### Rotary Lawnmowers

#### Hand Cylinder Lawnmower

Precision mowing as with shears. Smooth-running, low-noise and easy to push.

For lawn areas up to 500 m<sup>2</sup>, as a hand tool, or electric or battery-powered

#### Electric Lawnmower PowerMax™

Easy to use with strong performance due to a powerful motor with high-torque gear drive for excellent cutting results.

For lawn areas up to 800 m<sup>2</sup>, also for high and damp grass

#### Accu Rechargeable Lawnmower PowerMax™

Cable-free lawn mowing with a powerful lithium-ion battery. Easy to use, light and pleasantly quiet.

Cable-free lawn mowing for areas up to approx. 400 m<sup>2</sup>

#### Petrol-Driven Lawnmower

Robust with an especially powerful quality engine by Briggs & Stratton. Convenient for larger lawn areas.

For large and wild gardens up to approx. 1000 m<sup>2</sup> and more

## Trimming and adjusting lawn edges

A harmonious lawn appearance includes precisely cut lawn edges. A perfect lawn contour is achieved with mechanical grass shears, battery grass shears, or a trimmer, depending on the demand and length of the lawn edge.

#### Why?

Lawn edges are normally not reached by lawnmowers. That's why they are often longer and not precisely cut. There is no clear bordering against other garden areas and the lawn can grow into surrounding beds.

#### Where?

At difficult-to-access lawn edges around the bed, patio, trees and pond; along fences, gravel paths or natural stone walls.

#### When?

Best is before or after each mowing session.

**GARDENA TIP**  
 Cut the lawn edges before mowing the lawn. The lawn-edge cuttings will be taken up during mowing, thus sparing the need for additional raking.

## GARDENA Accu Rechargeable Lawnmower PowerMax™ 36 A Li

**Compact and saves space**  
 Thanks to the folding handle with quick-lock lever

**Easy control of filling level**  
 Through viewing window on grass catcher

**Cable-free lawn mowing**  
 Powerful lithium-ion battery  
 36 V / 3.0 Ah Li-ion

**Flexible application**  
 Either mow and catch, or mow and mulch

**Easy cutting-height adjustment**  
 Central cutting-height adjustment in 5 stages from 27 - 65 mm

**Easy to turn and manoeuvrable**  
 Thanks to wheels with soft plastic components and special tread

Article No. 4035

## Adjusting lawn edges – wherever needed.

#### GARDENA Turbotrimmers

A trimmer is useful wherever the lawnmower cannot reach, e.g. between shrubs, on steep slopes, in high grass, strong grass or weeds. With the use of a plastic filament or blade, grass and lawn edges can be comfortably cut with little effort and without bending over.

#### GARDENA Accu Grass Shears

You'll cut lawn edges comfortably and precisely with the battery-powered grass shears. Lawn edges in larger areas can be shortened without effort but with care, also around ponds, beds or patios.

#### GARDENA Grass Shears

The mechanical grass shears are ideally suited for lawn edges in smaller gardens and areas. Also in narrow and difficult-to-access spots, they ensure a perfect lawn.

## Trim

### SmallCut 300

Light, easy-to-use trimmer for small trimming work in the garden.

For small gardens

Article No. 8845

### EasyCut 400

Flexible all-round trimmer for longer edges and hard-to-reach spots.

For family gardens

Article No. 8846

### AccuCut 450 Li

Cable-free trimming of lawn edge thanks to the powerful lithium-ion battery.

For large gardens

Article No. 8841

### ProCut 1000

Professional trimmer for large areas with dense grass growth and weeds.

For wild gardens

Article No. 8852

## Cut lawn edges

### Accu Grass Shears ComfortCut

Li-Ion POWER

Cable-free with powerful lithium-ion battery. With quality blades that can be replaced without tools, swivelling comfort handle for ergonomics and with wheels.

Article No. 8893

### Set Accu Grass Shears ClassicCut

Cut lawn edges comfortably from an upright position. Complete set with telescopic swivel handle and wheels.

Article No. 8890

### Classic Grass Shears

For precise cutting of lawn edges – also in difficult-to-access areas.

### Comfort Grass Shears, rotatable

Precise work with ergonomically shaped handles. Ideal for left- and right-handed people, thanks to the 360°-rotatable blades.

## GARDENA Accu Grass Shears ClassicCut

Li-Ion POWER

**Flexible**  
Tool-free switch from grass shears to shrub shears.

**Lies well in the hand**  
With comfortable handle

**Light and easy to use**  
Cable-free, weighs only 650 grams

**High-performance**  
Work time up to 45 min. thanks to easy-care lithium-ion battery

Article No. 8885

## Aerate, rake, fertilise and care for

Everything that is good for the lawn makes it more beautiful: This begins with the ideal seed planting and continues with the removal of thatch and moss, sufficient oxygen to the roots, and the supply of nutrients. When you care for your lawn and continuously free it from weeds, you'll be able to enjoy lush, dense green grass.

### GARDENA TIP

By additionally distributing sand after aerating, your lawn will become more porous for water, air and nutrients.

### Why aerate?

Over the entire year, dead grass stalks, moss and fungus collect on the lawn and hinder its thriving. During aerating, specially ground blades slice into the turf by a few millimetres. At the same time, the lawn is powerfully and sustainably freed from thatch, moss and weeds, thus providing more space, air and water to the roots. Roots can expand and take up vital nutrients.

### When aerate and how often?

After mowing, once or twice per season, in spring and autumn.

### Why fertilise?

With every cut, a lawn loses nutrients. To prevent this, you should regularly fertilise your lawn to ensure optimal care.

### When fertilise and how often?

A lawn is normally fertilised starting in March/April at intervals of four to five weeks until a final autumn fertilising in September to prepare for the winter.

### Why rake?

To successfully prevent thatch and moss all year round, the lawn can always be raked – in contrast to aerating. Stainless steel springs remove thick thatch and newly forming moss from the lawn, thereby providing quick, convenient and gentle care.

### When rake and how often?

After each 2nd or 3rd mowing – all year round.

### Why care for the lawn and remove weeds?

To ensure optimal care of your lawn, it is recommended to remove grass cuttings, leaves and weeds from the lawn.

### When remove weeds and how often?

A lawn needs to be cared for all year round – as soon as grass cuttings, leaves or weeds collect on it.

## Aerate and rake

### Electric Lawn Aerator EVC 1000

Intensive treatment for your lawn. Recommended in spring and/or autumn.

For areas up to: approx. 600 m<sup>2</sup>  
 Weight: 10.6 kg  
 Output: 1000 W  
 With PowerPlus  
 Working width: 30 cm  
 Grass catcher: optional

Article No. 4068

Sharp, offset blades made of specially hardened, galvanised stainless steel penetrate the lawn by a few millimetres and remove thatch and dead grass from the soil.

### Electric Lawn Rake ES 500

Year-round care, can be carried out after each 2nd or 3rd mowing session.

For areas up to: approx. 600 m<sup>2</sup>  
 Weight: 9.5 kg  
 Output: 500 W  
 With PowerPlus  
 Working width: 30 cm  
 Grass catcher: optional

Article No. 4066

Low-wear stainless steel springs comb the lawn and gently remove moss and thatch. The springs can be easily and individually exchanged.

## Lawn care

### combisystem Gather Rake

- Frees the lawn from grass cuttings and leaves
- With grass trapping bar

Recommended handle length: 180 cm

Article No. 3381

### combisystem Plastic Fan Rake XXL vario

- For large-scale and time-saving raking of grass cuttings, leaves, etc.
- Can be divided into two parts for comfortable collection of the raked material
- Width 77 cm

Recommended handle length: 130 or 150 cm

Article No. 3107

### combisystem Adjustable Rake

- For fine and coarse raking material
- With elastic, adjustable zinc-plated spring-steel prongs for raking leaves, grass cuttings, aerating material, etc.
- Variable working width of 30 - 50 cm

Recommended handle length: 130 cm

Article No. 3103

### combisystem Lawn Edge Trimmer

- For clean cutting of lawn edges
- With hardened, sharpened steel edge
- Can be used like a spade or pushed along the edge of a lawn

Recommended handle length: 130 cm

Article No. 3149

## Seed and fertilise

### Classic Spreader 300

The Classic

Spreading width: 45 cm  
 Volume capacity: 10 litres  
 Recomm. lawn size: up to approx. 300 m<sup>2</sup>

Article No. 430

### Comfort Spreader 500

Extra wide for time-saving spreading

Spreading width: 53 cm  
 Volume capacity: 14 litres  
 Recomm. lawn size: up to approx. 500 m<sup>2</sup>  
 On-Off function on the handle for exact dosage

With comfort handle  
 With dosage table for standard fertilisers

Article No. 433

### Comfort Spreader 800

Extra wide and high for time-saving spreading

Spreading width: 53 cm  
 Volume capacity: 20 litres  
 Recomm. lawn size: up to approx. 800 m<sup>2</sup>  
 On-Off function on the handle for exact dosage

With comfort handle  
 With dosage table for standard fertilisers

Article No. 435

### Weeding Trowel

For effortless and efficient removal of weeds – without bending over.

Article No. 3517

### Easy functioning principle

1. Press into soil
2. Turn 180° to the right
3. Pull out – finished
4. Easy removal through the press of a button
