

Economy and performance at the turn of a dial.

The new HDS compact class with eco!efficiency mode.

Tough on dirt, easy on the environment.

The new HDS compact hot water pressure washer range offers a number of key cost-saving and time-saving benefits, not least its new ecoefficiency mode which reduces fuel consumption by 20%. The new models are ideal for small and medium-sized enterprises that have to wash vehicles, machinery, parts or equipment on a regular basis. The Jogger design allows the machines to be moved quickly and easily and also to be used off-site. Naturally, with the new HDS compact class, you are getting tried-and-tested, robust and durable technology, unrivalled low operating costs and ease of operation. For entry-level simplicity, choose the HDS 5/12 C. For the added convenience of steam setting, Servo Control and higher performance, choose the HDS 6/12 C or 110v 6/10 C. All models offer the peace of mind of a three-year warranty on the burner coil.

It's all in the detail.

Reliability and cleaning performance are the most important attributes for a pressure washer. But with attention to fine detail, we have developed a range of machines that offers much more. More convenience, more speed, more economy. All designed to make cleaning jobs faster and more thorough.

1 Economical

- eco|efficiency mode to reduce fuel consumption by 20%
- Machine Protector system and 3-year burner coil warranty
- Precise detergent dosage with rinsing function

2 Storage

- Integrated cable hook and spray lance tray
- Lockable accessory compartment for nozzles, tools etc.
- Large hose hook or hose reel

3 Easy to use

- Intuitive operation with single-button selector switch
- Central control panel with indicator lights
- Machine protector bottle replaceable from outside

4 Service-friendly

- Durable motor/pump unit (air cooled)
- Service indicator and oil level monitoring
- Fine-meshed water filter for optimum pump protection
- Exhaust temperature sensor

5 Mobility

- Jogger design with large wheels and castor
- Large handles in the chassis
- Integrated tilting aid at the rear

6 Ergonomic

- Ergonomically mounted push handle
- Easy-to-use hose reel (optional accessory)
- Wide filler necks for fuel and cleaning agent
- Hoses and cable positioned out of the way

Efficient and economical: with eco!efficiency.

The new HDS compact makes short work of even stubborn dirt in your business, as it is equipped with a high-performance burner that can heat the water from cold up to 150°C. Cleaning with hot water along with high pressure makes for high-speed cleaning, as oils, greases or soot can be removed much more easily. Consequently, you and your staff need up to 40% less time – and also save on cleaning agents.

The eco!efficiency mode makes daily cleaning tasks even easier. Just switch the machine to eco!efficiency to get superb cleaning performance at 60°C, but with diesel consumption reduced by 20%, saving money and the time needed to refuel, and reducing CO₂ emissions. This is the concept behind eco!efficiency – excellent cleaning results, but with reduced use of resources. You'll rarely need to clean with any other setting.

Everything in the right place: HDS compact class with optional smooth-running hose reel.

Nozzles, tools etc. always to hand, thanks to the lockable accessory compartment.

Simple to move: the HDS compact class features Kärcher's Jogger design with large wheels and castor.

Quick to fill: wide filler necks for fuel and cleaning agent.

Professional accessories, keeping your business clean.

The HDS compact class offers exceptionally high levels of convenience as standard: just push into position, plug in at the back, and operate from the front. Raise convenience level further with our range of fast-change accessories, designed to make cleaning jobs even quicker and more thorough.

1 Easy Press high-pressure gun with Softgrip insert

Ergonomic high-pressure gun reduces operator effort. Additional Servo Control on the gun for infinite variation of pressure and water flow rates (except on 5/12 C).

2 Foam lance (option)

Handy foam system for rapid and uniform application of cleaning agents.

3 Rotating washing brush (option)

Gently removes fine dust and traffic film from any surface.

4 Surface cleaner (option)

Increased surface cleaning performance and integrated suction make for economical cleaning of large surfaces.

5 Quick coupling (option)

Multiple accessories can be changed quickly and effortlessly with the quick coupling.

6 Hose reel (option)

Conveniently store the high pressure hose (up to 15m) on the machine, reducing risk of trip hazards and hose damage.

Compact and powerful: the HDS compact class cleaners.

Entry-level or full-feature, all HDS compact machines offer exceptional value for money and low whole life costs. Your specialist dealer will be pleased to advise you on the model best suited to your needs.
