

Implement your ideas accurately.

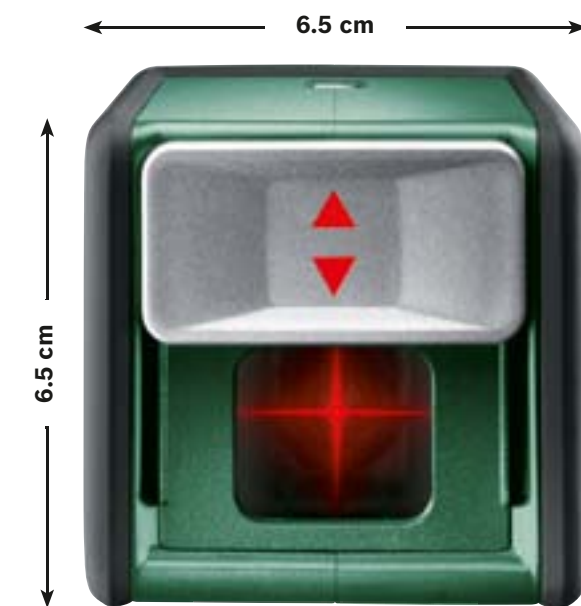

You don't always have to change your wallpaper to breathe new life into your own four walls. The Quigo enables you to implement your ideas exactly the way you imagined them. What are you waiting for? Let your creativity run free.

This practical cross line laser is ready for you to use in only a few seconds and projects a laser cross onto any wall. This cross has vertical and horizontal reference lines that automatically self-align. If you want to align something diagonally, you can use the Quigo's incline function to also work with laser lines that are diagonal and always straight. This ensures that there are no crooked lines in your designs.

Your biggest helper is only 6.5 cm small.

Paint, tiles, shelves, wallpaper or pictures – whatever you want to put on the wall, the Quigo will help you to get it precisely level. This small cross line laser is self-levelling, which means that it automatically aligns its laser beam. The Quigo therefore provides absolutely horizontal and vertical reference lines in seconds.

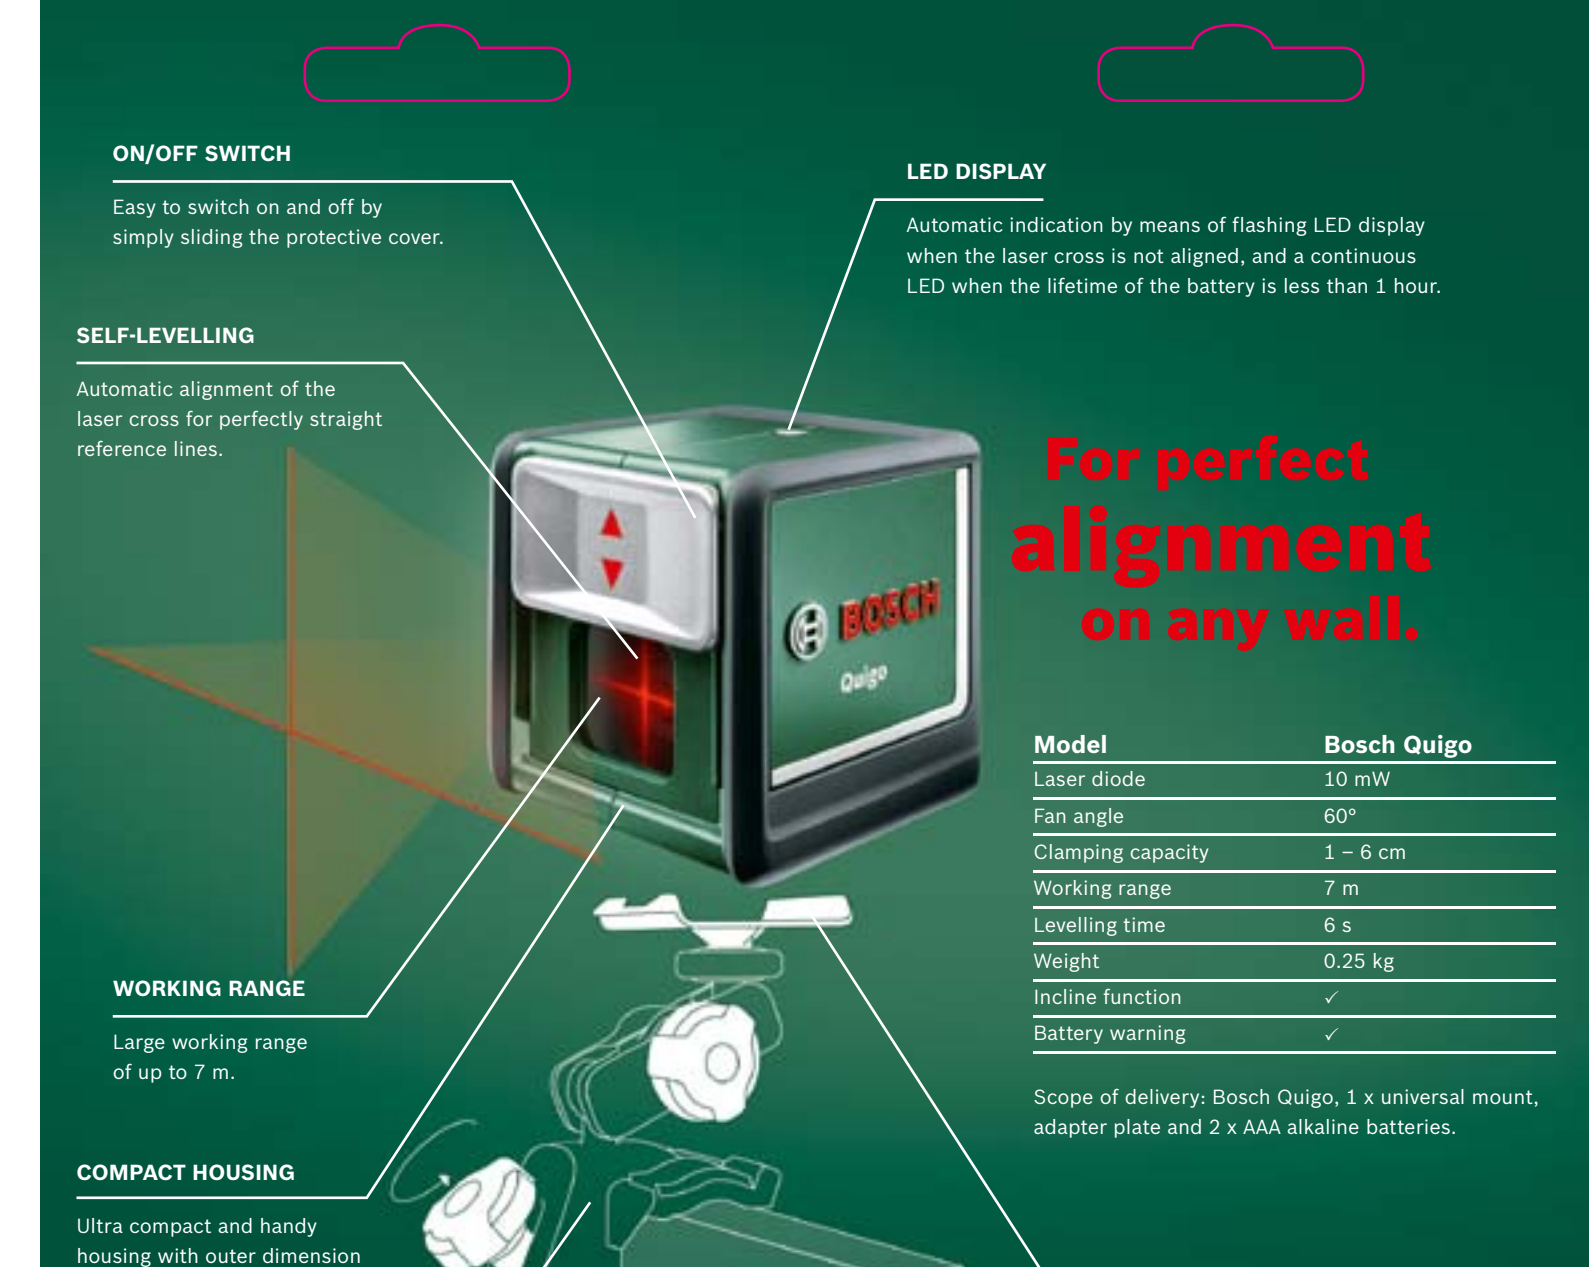

Life size illustration

Open to start.

Ready for use in seconds.

The on/off switch doubles as a protective cover. Simply slide it up and within a few seconds the Quigo will automatically align its beam and the laser cross will appear. You can then start to implement your ideas just the way you imagined them.

ON/OFF SWITCH

Easy to switch on and off by simply sliding the protective cover.

LED DISPLAY

Automatic indication by means of flashing LED display when the laser cross is not aligned, and a continuous LED when the lifetime of the battery is less than 1 hour.

SELF-LEVELLING

Automatic alignment of the laser cross for perfectly straight reference lines.

WORKING RANGE

Large working range of up to 7 m.

COMPACT HOUSING

Ultra compact and handy housing with outer dimension of only 6.5 cm.

MM 2 UNIVERSAL MOUNT

Holder with soft clamps and adapter plate for quick and flexible fixing.

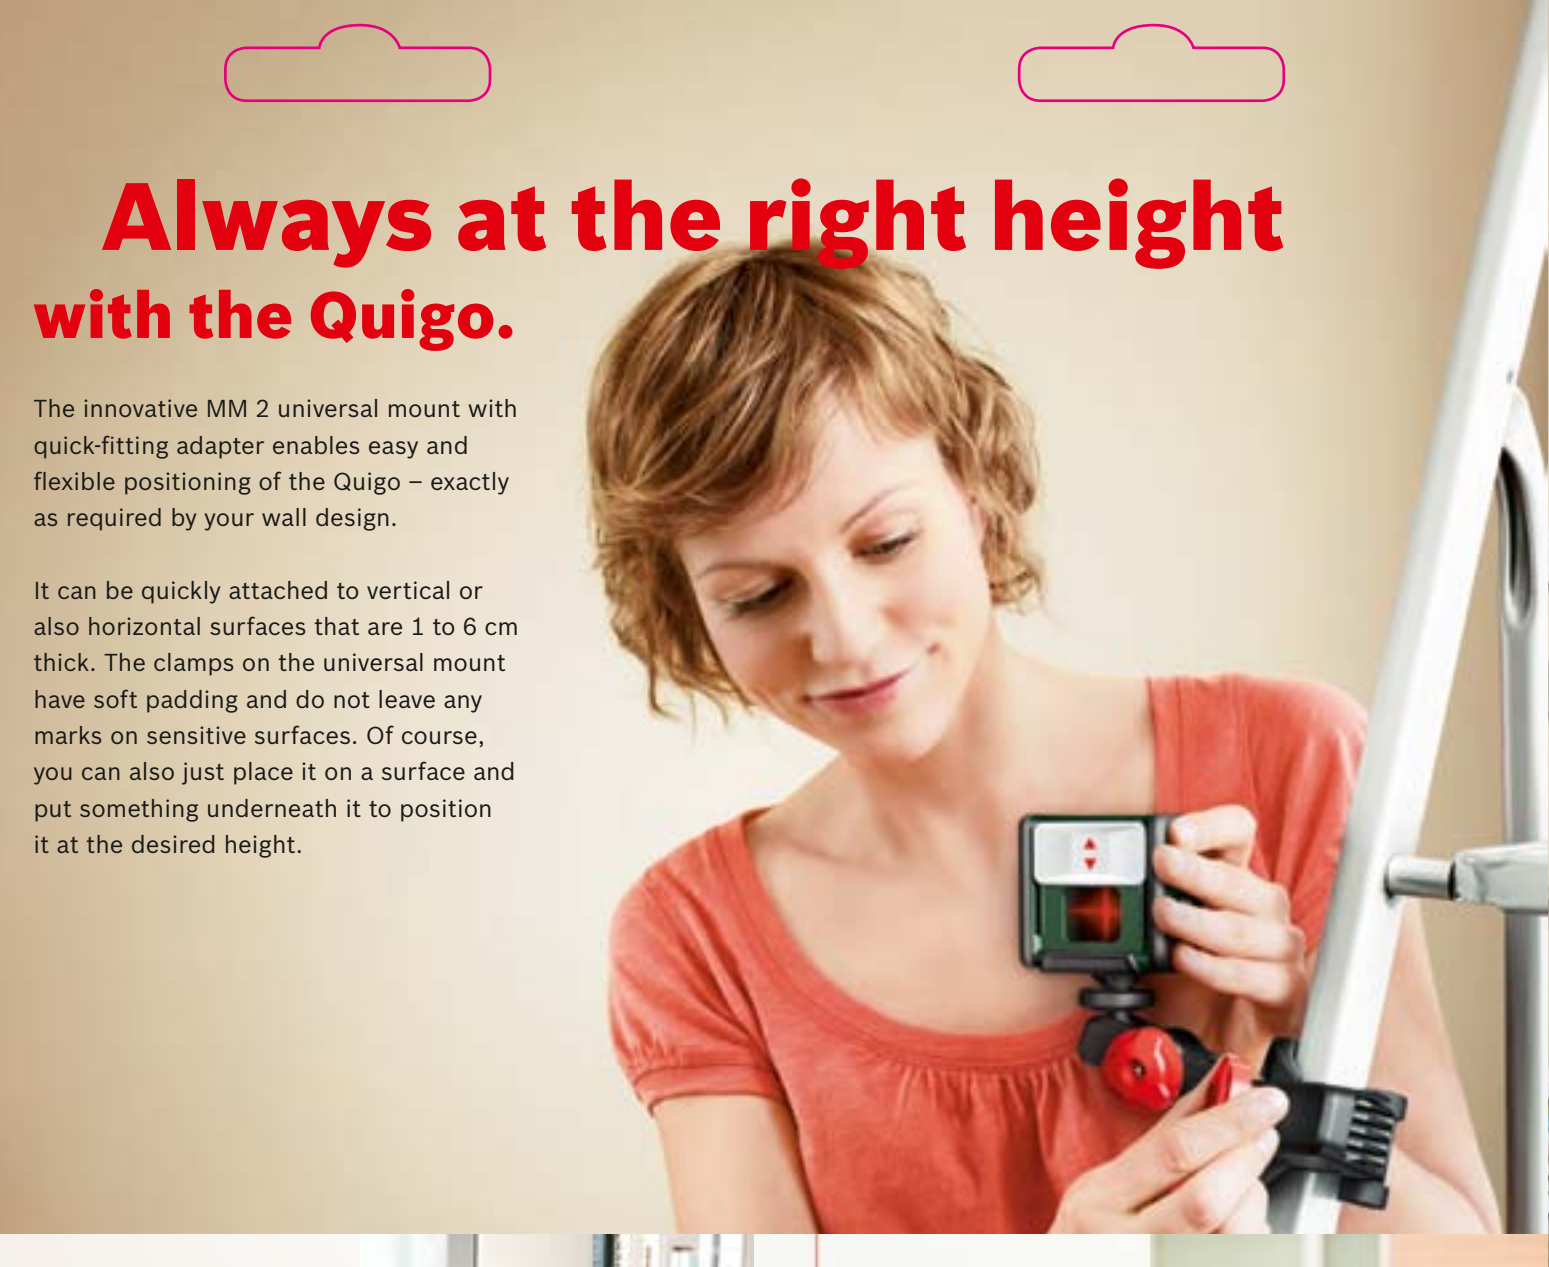

For perfect alignment on any wall.

Model	Bosch Quigo
Laser diode	10 mW
Fan angle	60°
Clamping capacity	1 – 6 cm
Working range	7 m
Levelling time	6 s
Weight	0.25 kg
Incline function	✓
Battery warning	✓

Scope of delivery: Bosch Quigo, 1 x universal mount, adapter plate and 2 x AAA alkaline batteries.

ADAPTER PLATE

The Quigo can be fixed to the universal mount or detached from it with only one hand movement.

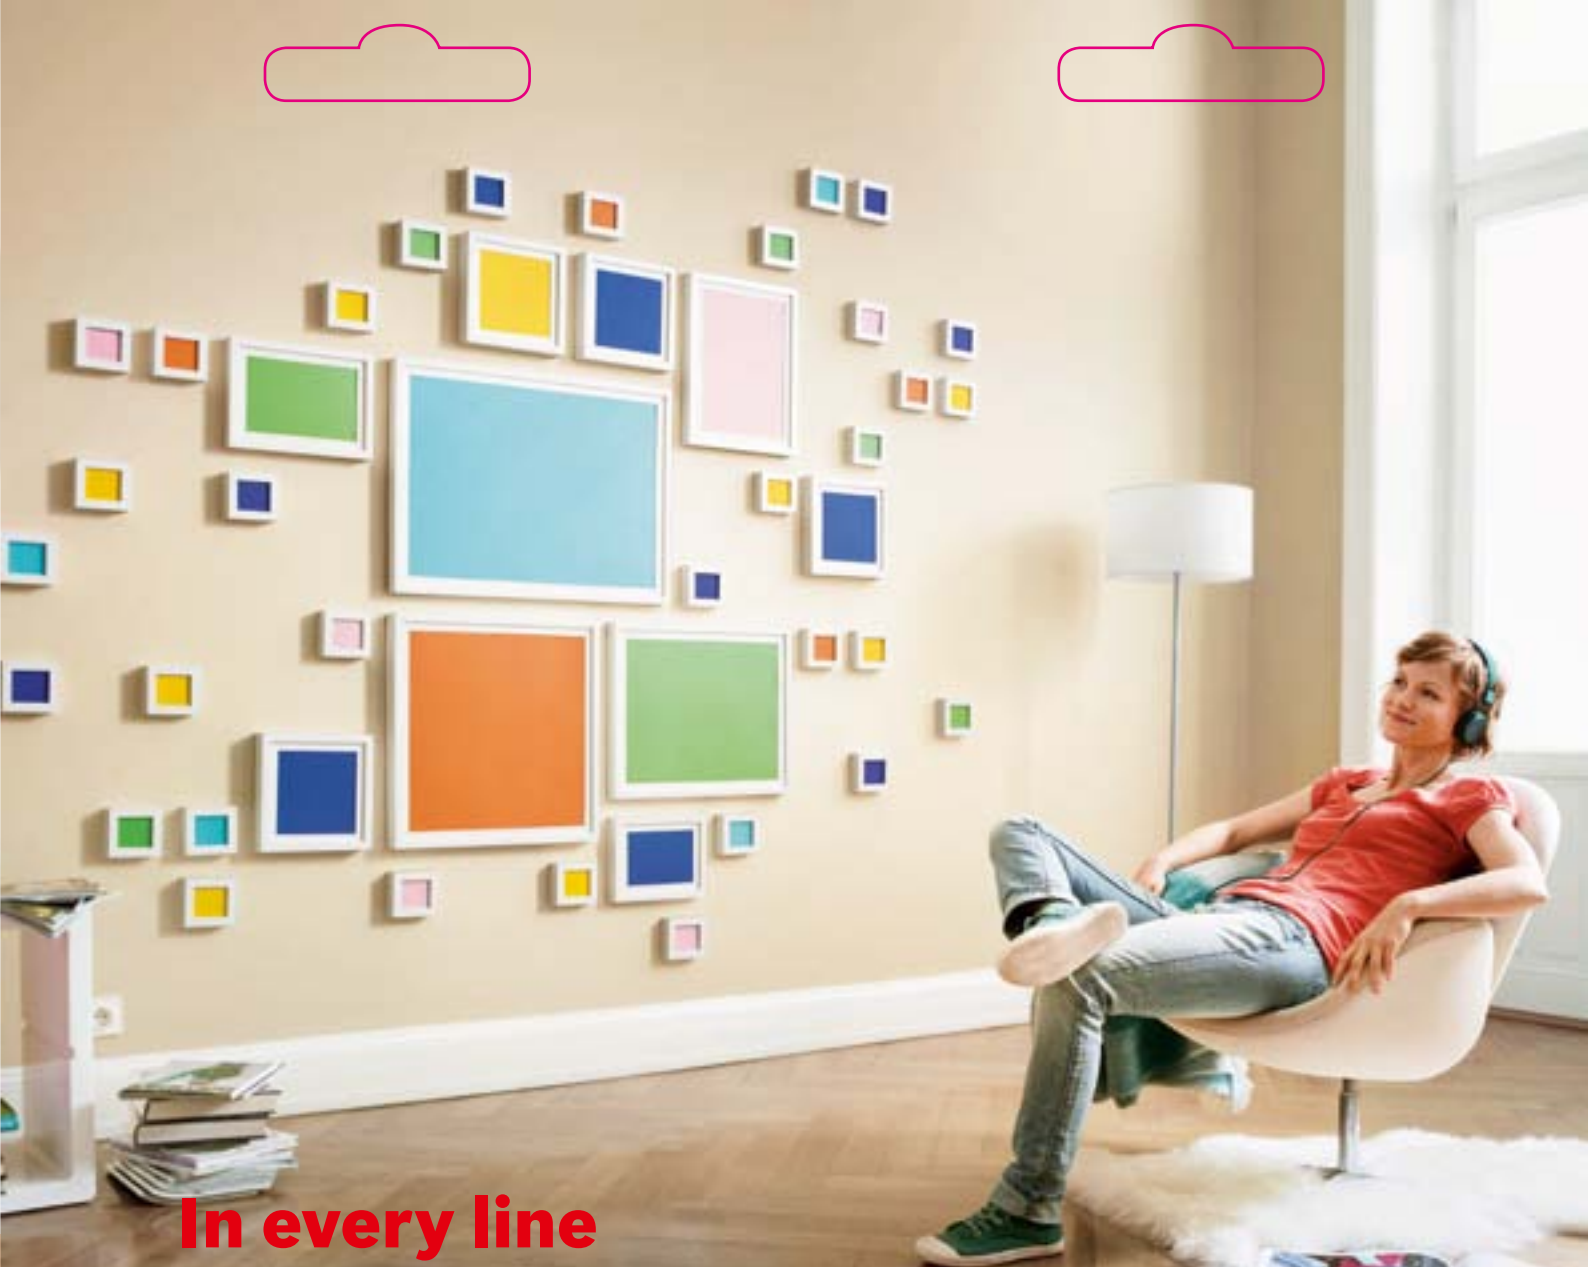

Always at the right height with the Quigo.

The innovative MM 2 universal mount with quick-fitting adapter enables easy and flexible positioning of the Quigo – exactly as required by your wall design.

It can be quickly attached to vertical or also horizontal surfaces that are 1 to 6 cm thick. The clamps on the universal mount have soft padding and do not leave any marks on sensitive surfaces. Of course, you can also just place it on a surface and put something underneath it to position it at the desired height.

Fixing possibilities:

- ▶ Tables and chairs
- ▶ Ladders
- ▶ Window sills
- ▶ Floor lamps
- ▶ Doors
- ▶ and many more

In every line a masterpiece.

With the Quigo you will never stray even a centimetre from your plans. Whether diagonal or straight: every picture, every tile, every stroke of paint and every piece of wallpaper will blend seamlessly into your creative concept. And the results will be impressive.

Turn your walls into works of art.

The Quigo from Bosch makes it easy for you to play with colours and areas when putting designs on your walls. How about a pattern in the style of Mondrian?

Mask the wall along the horizontal and vertical reference lines of the laser cross with masking tape and then fill the areas of colour precisely. Of course, you can use the incline function to also project diagonal lines onto any wall. In this way, you can create your very own work of art in striped, tiered or overlapping patterns.

You can use the Quigo to make e.g.:

- ▶ Horizontal patterns
- ▶ Vertical patterns
- ▶ Diagonal patterns
- ▶ Rectangular areas of colour on walls, doors, cabinets, shelves and many other surfaces

Put up wallpaper with lots of love and imagination.

The Quigo makes wallpapering incredibly easy for you, e.g. when you want to put up wallpaper in a child's bedroom. First of all, you use the horizontal laser line to define how high you want the wallpaper to go. You then apply the wallpaper strip by strip starting from this line. You can create a striking effect with wallpaper if you only apply a single strip or a border. The Quigo helps you to get these 100% straight as well.

Fit tiles in picture-perfect patterns.

Tiles offer unlimited possibilities for you to be creative. The Quigo helps you to implement your ideas perfectly. For example, you can make an attractive wall mosaic using different-coloured tiles.

This is how easy it is:

First of all, design the pattern you want to use on squared paper. The laser lines projected by the Quigo will then make it really easy for you to precisely position the tiles row by row on the wall. Laying tiles like this is fun.

Fix your fixtures precisely.

A wide screen mirror, a long picture gallery or a row of wall transfers – one hand movement is all it takes to fit everything 100% straight with the Quigo. Simply project the laser cross onto the wall with the perfectly aligned horizontal and vertical lines, and then line everything up with them. The result is guaranteed to be straight.

The large working range saves you having to constantly reposition the tool like you would with a spirit level. For example, you can use the Quigo's incline function to precisely align a banister along a reference line that is diagonal but straight.

You can use the Quigo to place e.g.:

- ▶ Shelves, mirrors and pictures
- ▶ Bathroom and kitchen accessories
- ▶ Curtain rails and clothes hooks
- ▶ Wall transfers and posters
- ▶ Groups of pictures

Starting point for creative ideas.

Make it your home.

Make it your home with the Quigo, the new cross line laser from Bosch.
