

# KITCHEN WORKTOP JIGS

The best worktop jigs in the world, designed to enable all 1/2" shank plunge routers to cut precise butt & scribe joints in postform worktops.

## All Jigs Require:

- A portable plunge router with 12.7mm (1/2") shank capacity and minimum 1300 wattage.
- A template guide bush with 30mm outside diameter.
- A TCT router cutter with 12.7mm (1/2") diameter and 50mm (2") cut length, see next page.
- Two 100mm (4") throat clamps.

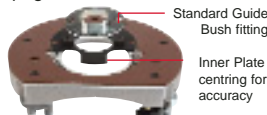

Router not included.

## Combi Jig Features:

- Machined from hard wearing solid laminate.
- Will produce a joint in 15 minutes including setting-up time.
- The holes for the location bushes for each function are colour-coded for quick and easy use. (COMBI 651 & 1002 only)
- Out-of-square joints can be accommodated.
- Facilities to cut various widths of board and thicknesses up to 42mm.
- Integral panel bolt connector recessing template with easy spanner access.
- Width setting stop for accurate positioning.
- Supplied with clear & comprehensive instructions for use.

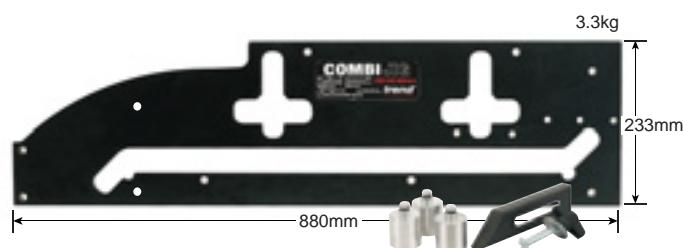

## NEW T10 Router

T10's adjustable Inner Plate for 100% accuracy. See page 103.
