

ROUTER CARVER

Patent No. US5,146,965

The Trend Router Carver system is a revolutionary routing concept that creates variable depth intricate wood carvings with a hand router.

- Carvings can be made on new or existing doors, frames and drawer fronts.
- The system comprises a unique engraving cutter housed in a conical bearing guide, used together with a set of templates and template frame.
- The templates have accurately shaped slots with varying widths which guide the Router Carver both horizontally and vertically to give authentic carvings.
- To use the Router Carver effectively your router must have a smooth plunge action.

HOW TO ORDER

A typical order for the Royal door rail design:

- 1 x Router Carver Cutter
- 1 x Template Set
- 1 x Frame to suit template

Further door rail templates can then be purchased and used with the frame.

Remember to include in your order the appropriate frames to fit your chosen Router Carver templates.

The Cutters

The Router Carver cutter consists of a 45° engraving 'V' groove TCT cutter, housed in an aluminium cone shaped bearing guide. The cutter depth is fully adjustable to vary carving effect and allows for any variance after re-sharpening. The 8mm shank Router Carver must be used in a professional router with an 8mm collet facility and base aperture of minimum 40mm. The 1/2" shank Router Carver must be used with a 1/2" collet facility and at least a 45mm diameter aperture. Always make trial cuts on a waste piece of material first.

Description	Order Ref	Price
Router Carver Cutter:		
8mm shank	RCCX8MMTC▲	£46.00
1/2" shank	RCCX1/2TC	£50.00
12mm shank	RCCX12MMTC	£50.00

Kitchen Door Designs

Six styles of templates for kitchen doors. The Royal, Cascade & Roma designs can also be enhanced by the addition of one of the two large sized rosette designs.
