

WOOD & WOOD BASED MATERIALS

Less teeth

- Preferred for ripping along the grain of hard and soft wood and other wood based material.
- Coarser finish.
- Faster feed rate.

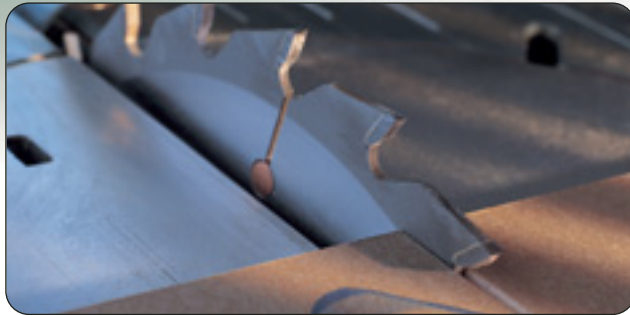

More teeth

- Preferred for cutting across grain of hard and soft wood.
- Finer finish.
- Slower feed rate.

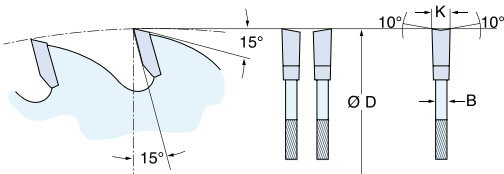

Suitable for:

- Softwood
- Hardwood
- Particle board
- MDF
- Hardboard
- Plywood

NEW SIZES
AVAILABLE

Alternate top bevel tooth form

Teeth have top and front bevel which allows the blade to cut more easily into the wood.

KEY

- **Coarse Finish**
 - Soft wood rip
 - Hard wood & exotic rip
 - Plywood rip
- **Medium/Coarse Finish**
 - Soft wood rip
 - Hard wood & exotic rip
 - Plasterboard & stone fibre board
 - Particle board
- **Medium Finish**
 - Soft wood rip & crosscut
 - Hard wood & exotic rip & crosscut
 - Plywood rip & crosscut
 - Soft fibre board
 - Plasterboard stone fibre board & cement bonded board
 - Particle board
- **Medium/Fine Finish & ● Extra Fine Finish**
 - Particle board
 - Boards veneered both sides
 - Chipboard laminated one-sided
 - Plywood rip & crosscut
 - MDF
 - Hardboard
