

Product Catalogue

Version 5.1 | armorgard.co.uk

Welcome

to the latest edition of the Armorgard product catalogue. This catalogue includes our extensive range of market-leading solutions for on-site security, safety and productivity. All of our products are exclusive to Armorgard and come from the work of our talented in-house R&D team. Our latest innovations are used as essential solutions for H&S best practices. You won't find the same products anywhere else, and you certainly won't find better.

For help, advice and to place orders, contact our team on **023 9238 0280** or email **sales@armorgard.co.uk**

What we stand for...

Our vision

To supply and produce innovative solutions to increase safety and productivity in workplaces all over the world.

Our mission

Design and manufacture market-leading products for secure tool storage, efficient manual handling and improved site safety.

Our values (SHAPE)

Supportive

- We treat our colleagues and our customers with respect
- We work as a team to ensure success

Honest

- We are clear in all communication, providing assurance to our customers and colleagues
- We build trust with all of our customers and colleagues through managing expectations

Accountable

- We do what we say we will do
- We are accountable as a team and as individuals

Passionate

- We strive to be positive role models, demonstrating passion for our business
- We are inquisitive and open to new ideas

Excellence

- We aim to exceed expectations through our performance
- We always aim higher for our customers

» Robust » Secure » Trusted

We look at things from a different angle

Every product is developed in response to a need. We listen to all customers and create the perfect solutions to their problems.

Our team continue to develop excellent new products that are tough, dependable and purpose-built for your needs. Plus, we won't keep you waiting. We pride ourselves on our high stock levels and next-day delivery on all stock items.

If you have an idea for a new product or feedback on an existing one, we'd love to hear from you. Please send an email to marketing@armorgard.co.uk

Next-day delivery on stock items ordered before 3pm

Replacement keys & parts available. See page 118

“Our product team is continually developing new ideas – tough, dependable products.”

armorgard strongbank™

The ultra-strong
range of tool safes

StrongBank™ – the world's toughest strongbox. When we started out, our goal was to design and build the ultimate secure storage box. The result was **StrongBank™**. Now, more than 30 years later, there is still nothing on the market that compares.

This state-of-the-art strongbox delivers virtually indestructible performance to deter even the most determined thief.

armorgard
oxbox™

The robust, good value solution for securing tools and equipment

OxBox™ tool vaults provide a fantastic combination of security and affordability. OxBox™ shares many of the premium features of our higher-priced storage box ranges, including locks, hinges, gas struts and paint finish. Its unique "folded" construction delivers outstanding strength. The OxBox™ is available in 6 sizes and is made from 1.5 mm and 2 mm steel.

Our range of robust steel tool drawers for vehicles and small spaces

TrekDror™ offers ultimate versatility to keep everything tidy and organised in your vehicle, from your power tools right down to that 5 mm screwdriver. TrekDror™ units are designed to fit neatly into smaller spaces and can be fixed down. Each TrekDror™ is cased in corrugated steel with reinforced ribs and 5-lever deadlocks to give you that extra layer of security.

A go-anywhere, multi-purpose cutting station with unrivalled safety features to minimise vibration, sparks, noise and dust

Our ever-popular Armorgard CuttingStation™ is a neat mobile workstation that eliminates the need for a separate cutting room and is essential for safely cutting lengths of material, such as conduit, timber, cable tray and pipe. The SS7 model includes lighting and chamfered corners to further reduce noise. You'll also find a new expandable working area to accommodate mitre saws and cutaway sides for handling longer materials.

» "IT REDUCES THE RISKS AROUND DUST, SAFELY CONTAINS SLURRY AND REDUCES NOISE FOR PEDESTRIANS"

Reduce noise pollution when cutting masonry and safely contain dust and slurry

Creating a designated, time-saving, portable area for safe cutting, the **CuttingCube™** is a purpose-built, portable unit that contains dust and slurry and reduces the noise pollution created when cutting masonry on site. Prioritising the safety and efficiency of both workers and projects, the **CuttingCube™** has quickly established itself as best practice. Featuring an easy-empty sump to contain the slurry, as well as durable, washable acoustic absorption panels, it's a product that is built to last.

A guide to storing hazardous substances

Storing fuel and other flammable substances

If you are storing fuels or chemicals, there are laws that you have to comply with. By applying the following five 'VICES' principles you will be well on the way to making sure that you are working safely with flammable substances and chemicals.

We stock a unique range of flammable and chemical storage products to ensure that you can be compliant.

Ventilation – Is there plenty of fresh air where flammable substances are being stored and used?

Ignition – Have all the obvious ignition sources been removed from the storage and handling areas?

Containment – Are your flammable substances kept in suitable containers?

Exchange – Can you exchange a flammable substance for a less flammable substance?

Separation – Are flammable substances stored and used well away from other process and storage areas?

Flammable liquids can give off large volumes of flammable vapours at room temperature. These vapours, when mixed with air, can ignite, often violently. Spilt flammable liquids can, if not contained, flow a long way to an ignition source and then flashback to the source of the leak. Spills on clothing can represent a serious risk of injury if ignited.

To help control these risks:

- Store flammable liquids in a separate storage area or in a purpose-made bin or cupboard.
- Dispense and use them in a safe place with good ventilation and no ignition source.
- Keep containers closed when not in use.
- Always dispense liquids over a tray and keep a non-flammable spill kit to hand.
- Dispose of contaminated materials safely or call in disposal experts.
- Always keep an adequate number of fire extinguishers to hand.

All storage cabinets must be designed to retain spills (110% volume of the largest vessel normally stored in it or 25% of the total amount stored, whichever is the greater). All flammable liquids must be stored in closed containers and kept in a store that is manufactured from materials that will resist fire for 30 minutes.

Storing pesticides and other chemicals

Location – position your store well away from areas that present a risk of fire.

Organising – mark the exterior of the store with general chemical danger warning signs.

Construction – provide a store that is resistant to fire for 30 minutes, capable of retaining leakage/spillage adequately ventilated and secure against unauthorised access.

Transporting pesticides and other chemicals

Pesticides or other chemicals should never be kept in a vehicle for long periods of time – maximum time would be a 24 hour period.

Never carry pesticides or other chemicals in the cab of tractors or any other vehicles. Use a vehicle with a floor to ceiling bulkhead, if possible, between the driver/passenger compartment and the load compartment.

All chemicals must be strapped or secure somehow during transit. It is highly recommended to fit secure containers/cabinets to the vehicle, either inside or securely mounted to the outside or on a trailer. Chemical safes must be sturdy, lockable and fixed down to the vehicle. Ventilation is not necessary.

Pesticides must always be secure against unauthorised access when away from your fixed store. Park your mobile store away from any location where water pollution could occur.

Try to work within sight of your mobile store, especially in public areas. Always ensure the cabinet or vehicle is locked.

The driver must have access in the vehicle to PPE, spillage kit, first aid (including eyewash), and also spare impermeable sealable containers in which to place split containers and any other contaminated material.

Transporting fuel and other flammable substances

The purpose of the regulations dealing with the carriage of dangerous goods is to protect everyone either directly involved or who might become involved, such as members of the emergency services or public. Regulations place duties on everyone involved in the carriage of dangerous goods to ensure that they know what they have to do to minimise the risk of incidents and guarantee an effective response.

Regulations regarding purchasing, transporting and storing fuel are becoming much more stringent. The following guidelines are for businesses transporting flammables.

Filling up containers at petrol stations

All petrol stations are under licence to supply fuel, very similar to alcohol licence. If they are caught breaching these licences, they could lose their right to supply fuel. By law, the only type of can which can be filled up is one approved to UN1203. Most petrol stations have restrictions that prevent more than two cans from being filled in one visit. Typical containers purchased from car accessory shops may not be so approved.

Transporting fuel in approved containers

Ensure that you do not carry over the maximum allowed by law without having an ADR licence. This is 333 litres, but HSE will always look at the amount you should have 'reasonably been carrying' if you are involved in an accident. A typical case of transporting fuel would be with 2 or 3 jerry cans. Providing those cans are UN approved, marked UN1203 and labelled with the flammable diamond, the only requirements by law are:

- Driver training in accordance with ADR1.3.
- Carry 2 kg fire extinguisher.
- Stow the jerry cans securely to avoid damage or loss from the vehicle.

The HSE class vans as 'workplaces' during the working day. If a vehicle is involved in an accident, not only do the above regulations come into force but also The Health

and Safety at Work Act. This involves safe storage of the fuel cans and requires that they are stored in secure lockable vented containers.

There is also the risk of spillage of goods, which could lead to fire, explosion or environmental damage. It is highly recommended that an absorbent spill kit is kept onboard every vehicle carrying any form of dangerous liquids.

Fire extinguishers are the subject of conditions from HSE also. They must be easily accessible to the vehicle crew and protected against the effects of the weather.

How Armorgard calculate the sump capacity

The sump capacity on all Armorgard products is calculated by the maximum amount of liquid that can be contained within the liquid-tight space in the base of a unit.

Disclaimer

The storage of chemicals, flammable substances and gases is the subject of many regulations. Some substances must be stored outside away from buildings. Others can be stored inside but are sometimes subjected to quantity limits. We would always recommend that you should seek the advice of the Health and Safety Inspectorate, your local fire officer, Trading Standards Office or any other qualified body. Armorgard is not an advisor as to where goods shall be stored and can take no liability for any storage situation.

All information can be found at www.hse.gov.uk or by calling HSE's information line.

The cost-effective secure container for storing hazardous fuels and chemicals

COSHH regulations require that fuels and chemicals are transported and stored in a secure, lockable container. The Armorgard TransBank™ is purpose-built for exactly that, while protecting them from theft, fire and leakage. Constructed from heavy-duty steel plate, this high-quality, secure container accommodates standard jerry fuel cans and is equally suitable for use as a chemical safe.

armorgard

transbank chem™

The safe vault for storage and transportation of smaller volumes of chemicals

COSHH regulations require that anyone using chemicals must store them safely in a lockable container. The TransBank Chem™ has been specially designed to comply with all legislation regarding the storage of chemicals, both in vehicles and in fixed locations. To maximise internal space, vaults are built to accommodate a range of standard sized chemical cans.

The ultra-secure walk-in hazardous storage unit for fixed installation

The Armorgard **FlamStor™** is the perfect solution for storing larger quantities of chemicals or flammable substances. Manufactured to an exacting standard throughout, this heavy-duty walk-in storage unit features a high-security anti-tamper door, fixed internal shelving and an innovative open steel floor, which allows spillages to drain directly into the sump. The **FlamStor™** can also be customised to suit your exact requirements.

SECTION 06

Replacement keys and parts

Lost keys?

We hold in-stock replacement keys for our products for up to 5 years after purchase, so we can get you quick access should you lose your keys. Each product carries a unique serial number, and this enables us to locate your exact key and despatch immediately.

Spare parts

To complement our extensive range, we also hold in stock a vast supply of spare parts for our products. This enables us to deliver quickly and fulfil any replacement requirements.

Castors

Added flexibility for many of our products.

High-quality, heavy-duty castor sets with a unique quick-fit system. Replacements available for simply bolting on yourself, using the pre-drilled holes.
