the spirit of adventure

The best thing about travel is the sense of freedom, adventure and excitement it brings. Whether you travel to the ends of the earth, or to the other end of town, it's the sense of something different that makes it so exhilarating. The last thing you want is to be weighed down with concerns about whether or not your gear is safe and secure.

Like any adventure, you are better equipped to throw yourself into it if you have a definite sense of basic security. It takes a split second for a seasoned pickpocket to make you another victim whilst you examine a map, assist with a photograph or check a timetable.

To help all types of traveller really get the most out of their adventure, we have created the range of travel security products featured in this directory. Now you can help your customers get on with their adventure and **do more.**

eXomesh[®] - what is it?

anti-theft technology

eXomesh[®] is a strong and protective slashproof wire mesh woven together using lightweight, flexible, high-tensile stainless steel cables and crimps.

We use eXomesh[®] anti-theft technology in 2 unique ways:

- (A) As a complete steel cage to encase and secure your belongings in our eXomesh[®] Ultimate products (either fitted externally to bags or laminated between fabric to form a bag).
- (B) As slashguards placed between layers of fabric in our range of anti-theft bags.

(A) eXomesh[®] Ultimate

eXomesh[®] Ultimate
external security system

(B) eXomesh[®] Slashguard

eXomesh[®] Slashguard
laminated into bag fabric

This logo guarantees you the
“Ultimate” in Pacsafe security.

1. **Slashproof eXomesh[®] cage** – a lightweight and slashproof high-tensile stainless steel eXomesh[®] cage encases your valuables (either fitted externally to bags or laminated between fabric to form a bag)
2. **Locks closed** - the patented locking device cinches and locks the eXomesh[®] cage or bag completely closed
3. **Locks to a secure fixture** - an integrated, heavy duty, stainless steel cable connected to the eXomesh[®] cage and locking device locks your valuables to a secure fixture

anti-theft features explained

At Pacsafe we have incorporated a number of anti-theft features into our products.

Check the product packaging or the product index at the front of this catalogue to see which anti-theft features each Pacsafe product has.

eXomesh® Slashguard panels

Many thefts succeed when the exposed lower section of bags are slashed allowing contents to drop out without the victim knowing. Pacsafe have developed slashproof panels by discretely hiding a layer of eXomesh® between two layers of fabric. These lightweight slashguards are placed in vulnerable sections of the bag, to protect against a bag slasher's knives and blades.

Slashproof belts / straps / cables

A split second while looking at a map or asking for directions is all it takes to cut through a conventional strap or belt. Pacsafe waist belts and shoulder straps contain slashproof, high-tensile stainless steel wire. All Pacsafe securing cables are also made from heavy duty steel wire.

or

Snatchproof anchor clips

When traveling, commuting or out with friends, you're not always able to keep a close eye on your belongings. Pacsafe bags have metal clips on slashproof belts and straps which can be unfastened at one end to loop and anchor your bag to secure fixtures, for example, the arm of your restaurant chair.

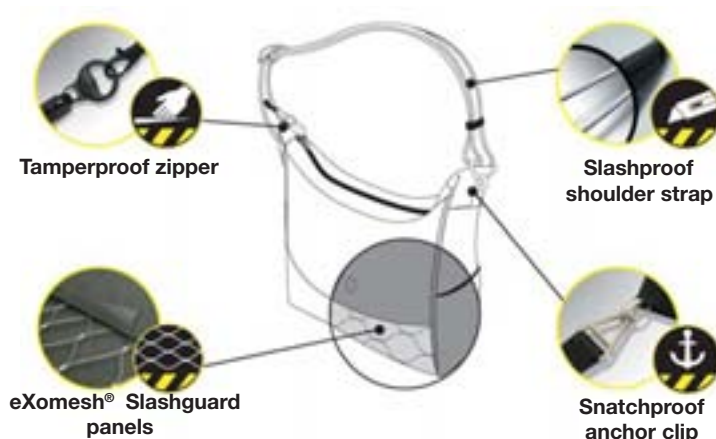

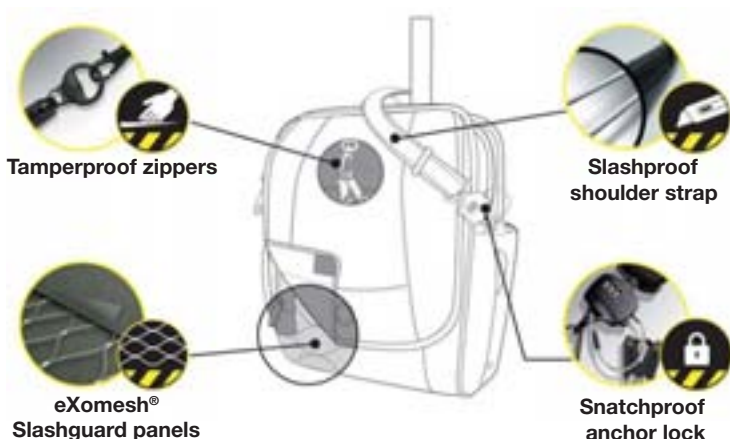

Snatchproof anchor locks

For extra security, Pacsafe have products featuring our additional snatchproof locking system. With these products you can anchor your bag to a secure fixture and lock it safely there as well.

Tamperproof zippers / compartments

Subways, busy traffic intersections and crowded markets are prime pickpocket locations. Pacsafe bags offer tamperproof zippers that lock closed or latch to metal clips, and flap-covered compartments with hidden safety hooks. Clever solutions to keep prying hands out.

anti-theft convertible carry-on bag

with eXomesh®

The MetroSafe 400 is an ideal bag to use as carry-on luggage for an overnight stay or short break. The integrated combination lock and high-tensile stainless steel cable allow the bag to be locked through the tamperproof zipper rings then locked to a secure fixture in a hotel room or rental car, or on public transport. The bag has a flexible, padded construction with four side compression straps for versatility. There's a special padded compartment for a 15.4" laptop to ensure it is protected at all times. Depending on requirements, the bag can be easily converted from a shoulder bag to a backpack by simply switching the detachable shoulder strap with the concealable backpack straps.

anti-theft features

- eXomesh® Slashguard on top and all side panels
- Snatchproof anchor lock and allows the bag to be locked to a secure fixture
- Snatchproof backpack straps with new “ turn & lock ” hook allows the bag to anchor to a secure fixture
- Slashproof adjustable shoulder straps
- Tamperproof lockable zippers on main compartment and tamperproof zipper on top panel pocket

additional features

- Detachable padded shoulder strap
- Concealed backpack straps
- Comfortable carrying handles on top and side
- Padded and reinforced base for added durability and comfort while using backpack straps
- Padded, zippered laptop compartment designed for up to 15.4" laptops
- Mesh zip pockets inside main compartment
- Elastic cross straps prevent contents from shifting during transport
- Large top slip pocket
- Four side compression straps

specifications

- Materials: 840 ballistic nylon, high-tensile stainless steel wire
- Dimensions: 32 x 47 x 17 cm / 12.6 x 18.5 x 6.7 in
- Volume: 21 L / 1282 in³
- Weight: 1.4 kg / 3 lb 1 oz
- Shoulder Strap Length Max: 143 cm / 56.3 in
- Shoulder Strap Length Min: 82 cm / 32.3 in

carrysafe™ 300

ant-theft lockable shoulder strap

CarrySafe 300 Lockable Shoulder Strap is a wire-reinforced, anti-theft shoulder strap featuring a built-in combination lock that enables you to lock your bag closed and to a secure fixture. To lock the bag closed, a wire cable built into the lock can be fed through zipper pullers and then housed in the same lock to prevent someone opening the bag.

anti-theft features

- Slashproof adjustable shoulder strap
- Snatchproof shoulder strap with built-in combination lock not only anchors your attached gear to a secure fixture but locks it there as well
- Tamperproof lockable integrated high-tensile wire security loop to lock zippers

additional features

- Soft-cushioned non-slip shoulder pad

specifications

- Materials: nylon, high-tensile stainless steel wire
- Max Length: 128 cm / 50 in
- Width: 4 cm / 1.5 in
- Weight: 300 g / 10 oz

 Built-in padlock

Model # PE141NT

wrapsafe™

adjustable cable lock

The heavy duty WrapSafe Adjustable Cable Lock is an innovative, high-tensile stainless steel cable combined with tough polycarbonate beads. This combination allows you to bind WrapSafe tightly around luggage of any size, making it far superior to common cable locks which only secure handles and straps. Use it to secure the contents of briefcases, suitcases, backpacks, roof-rack luggage, golf bags and bicycles. WrapSafe is light and flexible and comes with its own carry pouch which makes it very travel friendly.

anti-theft features

- **Slashproof heavy duty steel cable**
- **Snatchproof locking system not only anchors your gear to a secure fixture but locks it there as well**

additional features

- **Multiple beads on cable make it adjustable to secure and lock any size bag**

specifications

- **Materials:** polycarbonate, high-tensile stainless steel wire
- **Length:** 2.5 m / 8 ft
- **Wraps any item with circumference up to:** 170 cm / 67 in

Model # PE180YB

bucklesafe™ 100

anti-theft backpack buckle lock - TSA approved

BuckleSafe now makes it possible to lock the side-release buckles that are found on many top-loading backpacks and other bags. The included TSA approved padlocks mean even checked luggage can be locked, as security agents in airports can open and relock the BuckleSafe during inspection, using secured tools.

anti-theft features

- **Tamperproof locking device with TSA padlock**

additional features

- **2 x BuckleSafes and 2 x 22mm solid brass TSA padlocks per pack**
- **Straps can be tightened but not be loosened once locked**

specifications

- **Designed to fit standard 1" / 25mm single side adjustable side-release buckles**
- **Material:** Polycarbonate
- **Weight (including lock):** 54 g / 1.9 oz

2 x TSA padlocks included
